NOTE GENERALI | GENERAL NOTES

| ALLGEMEINE HINWEISE | NOTES GÉNÉRALES | NOTAS GENERALES

- 01** **Le dimensioni indicate nel presente listino sono nominali e soggette a tolleranze di lavorazione. Le quote potranno essere modificate di alcuni millimetri in base al tipo di mobile da abbinare o maniglia richiesta al momento dell'ordine**
The above-mentioned values refer to nominal dimensions subject to machining tolerances. They might change by a few millimetres depending on the type of furniture to match or handles requested upon order.
Bei den oben genannten Abmessungen handelt es sich um Nenngrößen, die Bearbeitungstoleranzen unterliegen. Die Maße können in Abhängigkeit von der bei der Bestellung gewünschten Art des zu kombinierenden Möbels oder des Griffs um einige Millimeter variieren.
Les dimensions indiquées ci-dessus sont nominales et sujettes à des tolérances d'usinage. Les cotes pourront étre modifiées de quelques millimètres selon le type de meuble à adapter ou de poignée requise, au moment de la commande.
Las medidas arriba indicadas son nominales y están sujetas a tolerancias de elaboración. Las cotas podrán ser modificadas algunos milímetros, según el tipo de mueble por combinar o el tirador solicitado en el momento del pedido.
-
- 02** **Nelle vasche da bagno le misure nominali hanno sempre una tolleranza di lavorazione dell' 1%**
Bath tubs always have a 1% working tolerance
Die Nennmaße der Badewannen weisen immer eine Fertigungstoleranz von 1 % auf
Pour les baignoires les mesures nominales ont toujours une tolérance de fabrication de 1%
En las bañeras las medidas nominales tienen siempre una tolerancia de elaboración del 1%
-
- 03** **Posizionamento reversibile**
Reversible positioning
Umkehrbare Positionierung
Position réversible
Colocación reversible
-
- 04** **Le specchiere in rame e rame spazzolato hanno le giunzioni a vista negli angoli**
The mirrors in copper and brushed copper have visible joints in the corners
Die Spiegel aus Kupfer und gebürstetem Kupfer haben sichtbare Fugen in den Ecken
Les miroirs en cuivre et cuivre brossé ont des joints visibles sur les coins
Los espejos en cobre y en cobre cepillado tienen juntas visibles en las esquinas
-
- 05** **Importante: nei cassetti di larghezza superiore a 90 cm, con sistema di apertura a spinta, viene sempre installata un'unità aggiuntiva di sincronizzazione per migliorarne ulteriormente la funzionalità**
Important: drawers of a width exceeding 90 cm with push-opening systems are always supplied with an additional unit of synchronisation to further improve functionality
Wichtig: in Schubladen, die breiter als 90 cm sind und über ein Drucköffnungssystem verfügen, wird immer die zusätzliche Synchronisationseinheit installiert, um die Funktionalität weiter zu verbessern
Important: dans les tiroirs d'une largeur supérieure à 90 cm, avec système d'ouverture à poussée, une unité supplémentaire de synchronisation est toujours installée afin d'en améliorer le fonctionnement
Importante: en los cajones con un ancho superior a 90 cm, con sistema de apertura a empuje, se encuentra siempre instalado una unidad adicional de sincronización para mejorar su funcionamiento
-
- 06** **Maniglia fresata orizzontale (art.D9G) non installabile**
Horizontal milled handle (art. D9G) cannot be installed
Horizontaler, eingeprägter Griff (Art. D9G) nicht installierbar
Poignée fraisée horizontale (art.D9G) ne peut pas être installée
Tirador fresado horizontal (art.D9G) no instalable
-
- 07** **I top in legno pregiato sono realizzati in struttura a sandwich e sono trattati con strato protettivo acrilico superficiale. In ogni caso tutti i top in legno necessitano di una particolare cura nell'utilizzo quotidiano atta ad evitare il ristagno dell'acqua.**
The tops are made of fine wood sandwich construction and are treated with protective layer acrylic surface. In any case, all the wood top require special care in daily use, as to prevent water stagnation.
Die Tops aus hochwertigem Holz werden in Sandwich-Struktur hergestellt und mit einem Acrylschutz beschichtet. Dennoch erfordern alle aus Holz gefertigten Tops eine besondere Pflege im täglichen Gebrauch, um darauf das Anstauen von Wassers darauf zu vermeiden.
Les plans en bois de qualité supérieure sont réalisés avec structure à sandwich et ils sont traités avec une couche de protection en acrylique. En tout cas, tout les plans en bois ont besoin d'un soin particulier pour l'utilisation quotidienne, afin d'éviter la stagnation de l'eau.
-
- 08** **In abbinamento alla maniglia fresata art. D9G i top saranno realizzati in profondità 33 (per la profondità 35), 43 (per la profondità 45) e 53 (per la profondità 55)**
In combination with the milled handle (art. D9G), the tops will be manufactured with a depth of 33 (for the depth of 35), 43 (for the depth of 45) and 53 (for the depth of 55)
In Kombination mit dem eingeprägten Griff Art. D9G werden die Waschbecken mit einer Tiefe von 33 (für die Tiefe 35), 43 (für die Tiefe 45) und 53 (für die Tiefe 55) realisiert
Pour les assortir avec la poignée fraisée art. D9G, les plans hauts seront réalisés en profondeur 33 (pour la profondeur 35), 43 (pour la profondeur 45) et 53 (pour la profondeur 55)
En combinación con el tirador fresado art. D9G las encimeras se realizarán en profundidad 33 (para la profundidad 35), 43 (para la profundidad 45) y 53 (para la profundidad 55)
-
- 09** **Sono realizzabili piani integrati in Cristalplant anche in misura superiore a cm 240, fino ad un massimo di cm 300. Richiedere preventivo e fattibilità all'azienda**
Integrated Cristalplant wash basin consoles can even be custom manufactured in sizes larger than 240 cm, up to a maximum of 300 cm. Ask the company about prices and feasibility
Es können auch integrierte Platten aus Cristalplant mit Längen über 240 cm bis maximal 300 cm hergestellt werden. Wenden Sie sich für den Erhalt eines Kostenvoranschlags und die Überprüfung der Machbarkeit bitte an das Unternehmen
Les plans intégrés en Cristalplant peuvent être également réalisés selon des mesures supérieures à 240 cm, jusqu'à un maximum de 300 cm. Demander un devis et analyse de faisabilité auprès de l'entreprise
Se realizan planos integrados en Cristalplant también con medida superior a 240 cm, hasta un máximo de 300 cm. Solicitar presupuesto y factibilidad a la empresa
-
- 10** **Le mensole interne ed esterne delle colonne art. DT4 e DTD sono realizzate in finitura laccato bianco opaco**
The internal and external shelves of DT4 and DTD columns are finished in matte white lacquer
Die inneren und äußeren Bretter der Hochschränke Art. DT4 und DTD werden aus lackiertem Überzug weiß opak realisiert
Les étagères internes et externes des colonnes art. DT4 et DTD sont réalisées avec un fini laqué blanc mat
Los estantes internos y externos de las columnas art. DT4 y DTD están realizadas con acabado laqueado blanco mate

White

In questa sezione le collezioni 4.0, 7.0 e SHAPE disegnate e realizzate con particolare cura e attenzione per ogni dettaglio, senza mai trascurare il cuore e l'inconfondibile identità di Falper. Soluzioni innovative ideate per ambienti bagno di piccole e medie dimensioni. Bianco è il colore della purezza, della luce, dei sentimenti nobili. Un quotidiano straordinario da rivivere ogni giorno all'interno del vostro bagno.

This section includes the 4.0, 7.0 and SHAPE collections, which have been designed and made with particular care and attention to every single detail, without overlooking the heart and the unique identity of Falper. Innovative solutions conceived for small and medium-sized bathrooms. White is the colour of pureness, of light and noble sentiments. An extraordinary everyday to relive each day inside your bathroom.

White

Dieser Abschnitt enthält die Kollektionen 4.0, 7.0 und SHAPE, die mit besonderer Sorgfalt und Aufmerksamkeit bis ins kleinste Detail entworfen und hergestellt wurden, ohne das Herz und die einzigartige Identität von Falper zu übersehen. Innovative Lösungen für kleine und mittelgroße Badezimmer. Weiß ist die Farbe der Reinheit, des Lichts und der edlen Gefühle. Ein außergewöhnlicher Alltag erleben Sie jeden Tag in Ihrem Badezimmer.

Cette section comprends les collections 4.0, 7.0 et SHAPE, qui ont été conçues et réalisées avec un soin et une attention particuliers pour tous les détails, tout en gardant l'esprit et l'identité unique de Falper. Il s'agit de solutions innovantes conçues pour des salles de bains de petite et moyenne dimension. La couleur blanche représente la pureté, la lumière, les sentiments nobles. Un quotidien extraordinaire à revivre chaque jour dans votre salle de bains.

Esta sección incluye las colecciones 4.0, 7.0 y SHAPE, que han sido diseñadas y realizadas con especial cuidado y atención a cada detalle, sin pasar por alto el corazón y la identidad única de Falper. Soluciones innovadoras concebidas para los baños pequeños y medianos. El blanco es el color de la pureza, de la luz y de los nobles sentimientos. Un diario extraordinario revive cada día dentro de tu baño.

Exclusive

Essenze naturali trattate a olio, superfici laccate, piani in vetro e in materiali compositi realizzati con resine vegetali. Queste collezioni, ad alto contenuto di stile e design, vantano dettagli costruttivi e assemblaggi di precisione, dimensioni e configurazioni completamente personalizzabili, linee distintive senza tempo. Le collezioni che seguono sono esclusive e sono realizzate una ad una, per ogni nostro cliente.

Oil-treated natural essences, lacquered surfaces, tops in glass and in composite materials made with vegetable origin resins. These style and design-intensive collections are characterized by construction details and precise assemblies, customizable sizes and configurations, timeless distinctive lines. These collections are exclusive and made one by one for each of our customers.

Exclusive

Ölbehandelte natürliche Essenzen, lackierte Oberflächen, Glasplatten und Verbundmaterialien mit Harzen aus pflanzlichen Ursprungs. Diese Stil- und Designintensiven Kollektionen zeichnen sich durch Konstruktionsdetails und präzise Montage und Konfigurationen nach Kundenwunsch mit zeitlos markante Linien. Diese Kollektionen sind exklusiv und werden für jeden unseren Kunden einzeln und speziell hergestellt.

Essences naturelles traitées à l'huile, surfaces laquées, plans en verre et en matériaux composites réalisés avec de résines d'origine végétale. Ces collections riches en style et design sont caractérisées par de détails constructifs et d'assemblages de précision, de dimensions et de configurations complètement personnalisables, qui représentent de traits distinctifs intemporels. Les collections qui suivent sont exclusives et réalisées une par une pour chaque client.

Esencias naturales tratadas con aceite, superficies lacadas, tapas en vidrio y en materiales compuestos hechos con resinas de origen vegetal. Estas colecciones de estilo y diseño intensivo se caracterizan por detalles de construcción y ensamblajes precisos, personalizables Tamaños y configuraciones, líneas distintivas atemporales. Estas colecciones son exclusivas y se hacen una por una para cada uno de nuestros clientes.

CASSETTO IN LEGNO CON DIVISORI / WOODEN DRAWER WITH DIVIDERS / SCHUBLADE AUS HOLZ MIT TEILERN / TIROIR EN BOIS AVEC SÉPARATEURS / CAJÓN DE MADERA CON SEPARADORES

Art.	P	L		Cat.1/2
DQW	45	30-160	Cad./Each	249

Ordinare il numero di cassetti legno corrispondenti al numero di cassetti presenti nel mobile. Nello stesso mobile non è possibile ordinare due tipi di cassetti (di serie e legno). / Order the number of wooden drawers that corresponds to the number of drawers in the furniture. Two types of drawers in the same furniture cannot be ordered (standard or wood). / Bestellen Sie die Anzahl der Holzschubladen entsprechend der Anzahl der Schubladen im Möbelstück. Es ist nicht möglich, zwei verschiedene Schubladentypen (Standard und Holz) für das gleiche Möbel zu bestellen. / Commander le nombre de tiroirs en bois correspondant au nombre de tiroirs présents dans le meuble. Les tiroirs d'un même meuble ne peuvent pas être de deux types (de série et bois). / Colocar respectivamente el número establecido en los cajones de madera con el número de los cajones situados en el mueble. En el mismo mueble no se podrán colocar dos tipos de cajones distintos.(cajonera y de madera).

Realizzabili in tutte le finiture Falper legno e laccato opaco. Specificare sempre all'atto dell'ordine. / Drawers feasible in all Falper wooden and matt lacquered finishes. This must always be specified at the time of the order. / In allen Falper Holz- oder Mattlack-Farben möglich. Bitte stets bei der Bestellung die gewünschte Farbe angeben. / Les tiroirs sont réalisables dans toutes les finitions de bois et lacques opaque (gamme de couleurs Falper). Toujours spécifier au moment de la commande. / Los cajones se pueden conseguir en todos los acabados de madera y laqueado mate. Especificar siempre en el momento que realiza el pedido.

La finitura dei cassetti non influisce sulla "categoria" del mobile / The finish of the drawers does not affect the "colour Category" of the cabinet / Das Finish der Schubladen hat keinen Einfluss auf die „Kategorie“ des Möbelstücks / La finition des tiroirs n'affecte pas la "couleur" du meuble / El acabado de los cajones no afecta a la "clase de color" de los muebles

CASSETTO IN LEGNO CON DIVISORI / WOODEN DRAWER WITH DIVIDERS / SCHUBLADE AUS HOLZ MIT TEILERN / TIROIR EN BOIS AVEC SÉPARATEURS / CAJÓN DE MADERA CON SEPARADORES

Art.	P	L		Cat.1/2
DQW	45	30-160	Cad./Each	249

Ordinare il numero di cassetti legno corrispondenti al numero di cassetti presenti nel mobile. Nello stesso mobile non è possibile ordinare due tipi di cassetti (di serie e legno). / Order the number of wooden drawers that corresponds to the number of drawers in the furniture. Two types of drawers in the same furniture cannot be ordered (standard or wood). / Bestellen Sie die Anzahl der Holzschubladen entsprechend der Anzahl der Schubladen im Möbelstück. Es ist nicht möglich, zwei verschiedene Schubladentypen (Standard und Holz) für das gleiche Möbel zu bestellen. / Commander le nombre de tiroirs en bois correspondant au nombre de tiroirs présents dans le meuble. Les tiroirs d'un même meuble ne peuvent pas être de deux types (de série et bois). / Colocar respectivamente el número establecido en los cajones de madera con el número de los cajones situados en el mueble. En el mismo mueble no se podrán colocar dos tipos de cajones distintos.(cajonera y de madera).

Realizzabili in tutte le finiture Falper legno e laccato opaco. Specificare sempre all'atto dell'ordine. / Drawers feasible in all Falper wooden and matt lacquered finishes. This must always be specified at the time of the order. / In allen Falper Holz- oder Mattlack-Farben möglich. Bitte stets bei der Bestellung die gewünschte Farbe angeben. / Les tiroirs sont réalisables dans toutes les finitions de bois et lacques opaque (gamme de couleurs Falper). Toujours spécifier au moment de la commande. / Los cajones se pueden conseguir en todos los acabados de madera y laqueado mate. Especificar siempre en el momento que realiza el pedido.

La finitura dei cassetti non influisce sulla "categoria" del mobile / The finish of the drawers does not affect the "colour Category" of the cabinet / Das Finish der Schubladen hat keinen Einfluss auf die „Kategorie“ des Möbelstücks / La finition des tiroirs n'affecte pas la "couleur" du meuble / El acabado de los cajones no afecta a la "clase de color" de los muebles

CASSETTO IN LEGNO CON DIVISORI / WOODEN DRAWER WITH DIVIDERS / SCHUBLADE AUS HOLZ MIT INNENEINTEILUNG / TIROIR EN BOIS AVEC SÉPARATEURS / CAJÓN DE MADERA CON SEPARADORES

Art.	P	L		Cat.1/2
DQW	35-55	30-160	Cad./Each	249

Ordinare il numero di cassetti legno corrispondenti al numero di cassetti presenti nel mobile. Nello stesso mobile non è possibile ordinare due tipi di cassetti (di serie e legno). / Order the number of wooden drawers that corresponds to the number of drawers in the furniture. Two types of drawers in the same furniture cannot be ordered (standard or wood). / Bestellen Sie die Anzahl der Holzschubladen entsprechend der Anzahl der Schubladen im Möbelstück. Es ist nicht möglich, zwei verschiedene Schubladentypen (Standard und Holz) für das gleiche Möbel zu bestellen. / Commander le nombre de tiroirs en bois correspondant au nombre de tiroirs présents dans le meuble. Les tiroirs d'un même meuble ne peuvent pas être de deux types (de série et bois). / Colocar respectivamente el número establecido en los cajones de madera con el número de los cajones situados en el mueble. En el mismo mueble no se podrán colocar dos tipos de cajones distintos.(cajonera y de madera).

Realizzabili in tutte le finiture Falper legno e laccato opaco. Specificare sempre all'atto dell'ordine. / Drawers feasible in all Falper wooden and matt lacquered finishes. This must always be specified at the time of the order. / In allen Falper Holz- oder Mattlack-Farben möglich. Bitte stets bei der Bestellung die gewünschte Farbe angeben. / Les tiroirs sont réalisables dans toutes les finitions de bois et lacques opaque (gamme de couleurs Falper). Toujours spécifier au moment de la commande. / Los cajones se pueden conseguir en todos los acabados de madera y laqueado mate. Especificar siempre en el momento que realiza el pedido.

La finitura dei cassetti non influisce sulla "categoria" del mobile / The finish of the drawers does not affect the "colour Category" of the cabinet / Das Finish der Schubladen hat keinen Einfluss auf die „Kategorie“ des Möbelstücks / La finition des tiroirs n'affecte pas la "couleur" du meuble / El acabado de los cajones no afecta a la "clase de color" de los muebles

OPTIONAL PRESA ELETTRICA + PRESA USB / OPTIONAL ELECTRICAL OUTLET + USB SOCKET / OPTIONAL STROMSTECKDOSE + USB-ANSCHLUSS / OPTION PRISE ÉLECTRIQUE + PRISE USB / OPCIONAL ENCHUFE ELÉCTRICO + TOMA USB

CASSETTO IN LEGNO CON DIVISORI / WOODEN DRAWER WITH DIVIDERS / SCHUBLADE AUS HOLZ MIT TEILERN / TIROIR EN BOIS AVEC
SÉPARATEURS / CAJÓN DE MADERA CON SEPARADORES

Art.	P	L		Cat.1/2
DQW	35-55	30-160	Cad./Each	249

Ordinare il numero di cassetti legno corrispondenti al numero di cassetti presenti nel mobile. Nello stesso mobile non è possibile ordinare due tipi di cassetti (di serie e legno). / Order the number of wooden drawers that corresponds to the number of drawers in the furniture. Two types of drawers in the same furniture cannot be ordered (standard or wood). / Bestellen Sie die Anzahl der Holzschubladen entsprechend der Anzahl der Schubladen im Möbelstück. Es ist nicht möglich, zwei verschiedene Schubladentypen (Standard und Holz) für das gleiche Möbel zu bestellen. / Commander le nombre de tiroirs en bois correspondant au nombre de tiroirs présents dans le meuble. Les tiroirs d'un même meuble ne peuvent pas être de deux types (de série et bois). / Colocar respectivamente el número establecido en los cajones de madera con el número de los cajones situados en el mueble. En el mismo mueble no se podrán colocar dos tipos de cajones distintos.(cajonera y de madera).

Realizzabili in tutte le finiture Falper legno e laccato opaco. Specificare sempre all'atto dell'ordine. / Drawers feasible in all Falper wooden and matt lacquered finishes. This must always be specified at the time of the order. / In allen Falper Holz- oder Mattlack-Farben möglich. Bitte stets bei der Bestellung die gewünschte Farbe angeben. / Les tiroirs sont réalisables dans toutes les finitions de bois et lacques opaque (gamme de couleurs Falper). Toujours spécifier au moment de la commande. / Los cajones se pueden conseguir en todos los acabados de madera y laqueado mate. Especificar siempre en el momento que realiza el pedido.

La finitura dei cassetti non influisce sulla "categoria" del mobile / The finish of the drawers does not affect the "colour Category" of the cabinet / Das Finish der Schubladen hat keinen Einfluss auf die „Kategorie“ des Möbelstücks / La finition des tiroirs n'affecte pas la "couleur" du meuble / El acabado de los cajones no afecta a la "clase de color" de los muebles

Black

Le collezioni Monsieur, Edge e Eccentrico, sono icone del design contemporaneo, realizzate con materiali di particolare pregio, unendo le tecnologie più moderne a raffinata artigianalità. Pezzi unici ed inconfondibili, che uniscono i segreti della tradizione con tecniche produttive moderne. Falper offre ai clienti più esigenti personalizzazioni, soluzioni innovative, materiali e finiture preziose. Le collezioni che fanno parte di questa sezione sono destinate ad architetture esclusive, essenziali e senza compromessi.

The Monsieur, Edge and Eccentrico collections are icons of contemporary design and are made with materials of great quality by putting together the most modern technologies and a refined craftsmanship. They are unique and unmistakable pieces that combine the secrets of tradition with modern production techniques. Falper offers to the most demanding customers customized products, innovative solutions and precious materials and finishes. The collections that are part of this section are conceived for exclusive, essential and un-compromising architectures.

Black

Die Monsieur-, Edge- und Eccentrico-Kollektionen sind Ikone des zeitgenössischen Designs und werden mit hochwertigen Materialien durch die Zusammenstellung modernster Technologien und raffinierter Handwerkskunst hergestellt. Sie sind einzigartige und unverwechselbare Stücke, die die Geheimnisse der Tradition mit modernen Produktionstechniken verbinden. Falper bietet den anspruchsvollsten Kunden maßgeschneiderte Produkte, innovative Lösungen sowie wertvolle Materialien und Oberflächen an. Die Kollektionen dieses Abschnitts sind für exklusive, wesentliche und kompromisslose Architekturen konzipiert.

Les collections Monsieur, Edge et Eccentrico sont des icônes du design contemporain et sont réalisées avec de matériaux d'excellente qualité en unissant les plus modernes technologies à une artisanalité très fine. Il s'agit de pièces uniques et incomparables qui unissent les secrets de la tradition à de techniques de production modernes. Falper offre aux clients les plus exigeants de personnalisations, de solutions innovantes et des matériaux et finitions précieux. Les collections qui font partie de cette section sont destinées à des architectures exclusives, essentielles et sans compromis.

Las colecciones Monsieur, Edge y Eccentric son iconas del design contemporáneo y estan hechos con materiales de calidad combinando las tecnologías más modernas y la artesanía refinada. Son piezas únicas e inconfundibles que combinan los secretos de la tradición con las técnicas de producción modernas. Falper ofrece a los clientes más exigentes productos personalizados, soluciones innovadoras y materiales y acabados preciosos. Las colecciones que forman parte de esta sección están concebidas para arquitecturas exclusivas, esenciales e intransigentes.

Complements

Nella seguente sezione troverete la nostra ampia gamma di lavabi, lavamani, vasche da bagno, piatti doccia, specchi, specchi contenitori e rubinetti, ideali per completare i mobili scelti nelle sezioni precedenti, o per progettare e arredare bellissimi ambienti bagno anche completamente freestanding.

In the following section you will find our wide range of washbasins, handwashbasin, bathtubs, shower trays, mirrors, cabinet mirrors and taps, ideal to complete the furniture chosen in the previous sections, or to design and furnish a beautiful bathroom atmosphere, even completely freestanding.

Complements

In dem folgenden Abschnitt finden Sie das weitreichende Angebot an Waschbecken, Handwaschbecken, Badewannen, Duschwannen, Spiegeln, Spiegelschränken und Armaturen, die ideal sind, um die in den vorstehenden Abschnitten ausgewählten Möbel zu komplettieren, oder um ein wunderschönes Bad-Ambiente zu planen und einzurichten, auch vollständig freestanding.

Dans la section suivante, vous trouverez notre large gamme de lavabos, lave-mains, baignoires, receveurs de douche, miroirs, armoires miroir robinets, idéale pour compléter les meubles sélectionnés dans les sections précédentes ou pour concevoir et aménager de magnifiques salles de bains y compris de manière totalement indépendante.

En la sección que sigue, encontrarán nuestra amplia gama de lavabos, lavamanos, bañeras, platos de ducha, espejos, espejos contenedores y grifos, ideales para completar los mobiliarios elegidos en las secciones anteriores o para diseñar y decorar los hermosos ambientes de baño, incluso aquellos completamente independientes.

Caratteristiche / Characteristics / Eigenschaften / Caracteristiques / Características

I top in vetro ed i top in vetro con lavabo integrato sono realizzati con vetro di sicurezza extra chiaro, con procedimento di termoformatura nel caso dei lavabi integrati. Successivamente i top seguono un processo di detensione e di colorazione interna a freddo con vernici all'acqua. I top in vetro satinato sono ulteriormente trattati sulla superficie visibile con procedimento di sabbiatura e di formattazione della superficie con un procedimento antimacchia e antiimpronta permanente con vernici nanotecnologiche.

Glass tops and glass tops with built-in basins are made with extra clear safety glass with a heat moulding procedure in the case of built-in basins. Subsequently the tops follow a relaxation and internal cold colouring process with water-based varnishes. Frosted glass tops are further treated on the visible surfaces with a sanding and formatting process of the surface with a permanent stain-resistant and fingerprint resistant procedure with nanotechnological varnishes.

Die Waschtischplatten aus Glas mit oder ohne eingeformtem Becken sind aus extra hellem Sicherheitsglas gefertigt, wobei die Becken durch ein thermisches Verfahren eingeformt werden. Anschließend werden die Waschtischplatten einem Kaltverfahren zur Entspannung und internen Färbung mit Wasserlacken unterzogen. Waschtischplatten aus satiniertem Glas werden zusätzlich auf der sichtbaren Oberfläche sandgestrahlt und mit einer nanotechnologische Lackversiegelung zum dauerhaften Schutz vor Flecken und Fingerabdrücken behandelt.

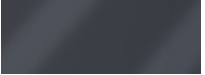

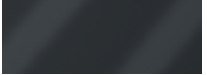

Les plans hauts en verre et en verre avec lavabo intégré sont réalisés avec un verre de sécurité extra clair, à l'aide d'un procédé de thermoformage pour les lavabos intégrés. Ensuite, les plans hauts suivent un processus de détensionnement et de coloration interne à froid avec des peintures à l'eau. La surface visible des plans hauts en verre satiné est ensuite traitée avec un procédé de sablage et de formatage de surface avec un processus anti-tâche et anti-empreinte permanent avec des peintures au traitement nanotechnologique.

Los top de vidrio y los top de vidrio con lavabo integrado están realizados con vidrio de seguridad extra claro, con un procedimiento de termoformación en el caso de los lavabos integrados. A continuación los top siguen un proceso de detensionamiento y de coloración interna en frío con pinturas al agua. Los top de vidrio satinado después son tratados sobre la superficie visible con un proceso de arenado y de formatación de la superficie con un procedimiento antimanchas y antihuellas permanente con pinturas nanotecnológicas.

CARATTERISTICHE | CHARACTERISTICS

| EIGENSCHAFTEN | CARACTERISTIQUES | CARACTERÍSTICAS

Recyclable

Riciclabile e riutilizzabile come inerte.

Recyclable and reusable as inert material.

Durable

5 anni di garanzia.

5 years warranty.

Fire resistant

Reazione al fuoco classe 1.

Class 1 fire rating.

Easy maintenance

Bruciate sigaretta facilmente ripristinabili.

Cigarette burns easily renewable.

Anti-yellowing

Resistenza alla luce 1000 h Xenon.

Light resistance 1000 h xenon lamp.

Resistant to thermal shock

UNI 9429:1989 nessuno difetto.

UNI 9429:1989 no flaws.

Repairable

Graffi e rotture facilmente ripristinabili.

Scratches and breaks easily renewable.

No-stain

Macchie facilmente ripristinabili.

Stains easily renewable.

Non-toxic

Ipoallergenico e atossico.

Hypoallergenic and non-toxic.

Certified quality

Certificato per USA e CANADA e per Europa.

Certification for USA and Canada and for Europe.

CRISTALPLANT BIOBASED / CERAMILUX SSL

Biobased

30% di resine vegetali OGM free.

30% of vegetable resins GMO free.

Recyclable

Riciclabile e riutilizzabile come inerte.

Recyclable and reusable as inert material.

Lightweight

Peso ridotto del 30% minori emissioni di CO2.

30% weight reduction reduced CO2 emissions.

Durable

5 anni di garanzia.

5 years warranty.

Fire resistant

Reazione al fuoco classe 1.

Class 1 fire rating.

Easy maintenance

Bruciature sigaretta facilmente ripristinabili.

Cigarette burns easily renewable.

Anti-yellowing

Resistenza alla luce 1000 h Xenon.

Light resistance 1000 h xenon lamp.

Resistant to thermal shock

UNI 9429:1989 nessuno difetto.

UNI 9429:1989 no flaws.

Repairable

Graffi e rotture facilmente ripristinabili.

Scratches and breaks easily renewable.

No-stain

Macchie facilmente ripristinabili.

Stains easily renewable.

Non-toxic

Ipoallergenico e atossico.

Hypoallergenic and non-toxic.

Certified quality

Certificato per USA e CANADA e per Europa.

Certification for USA and Canada and for Europe.

Greenguard Gold

Origine BIO e emissione sostanze volatili certificata da UL.

Bio origins and emission of volatile substances certified by UL.

* Pelli intere, in primo fiore, trattate con concie e procedimenti speciali che esaltano il vissuto e la morbidezza. Le pelli Baxter sono uniche, irripetibili esattamente come i prodotti Falper. Vanno trattate con cura e curate come si deve ai prodotti di grande pregio. In dotazione con ogni elemento George finito in pelle Baxter il vanity kit per la cura e la manutenzione. / *Full-grain leather made from whole hide, tanned and treated to enhance its soft texture and worn look. Baxter leather is just as exclusive and unique as Falper products are, and like all prestigious products, requires careful maintenance. Every George item with Baxter leather finish comes with a care and maintenance vanity kit* / Volleder, als Narbenleder, die speziellen Gerbungen und besonderen Verfahren unterzogen werden, welche den „verlebten“ Effekt und die Weichheit unterstreichen. Die Baxter Leder sind einzigartig und unnachahmlich, genau wie die Falper Produkte. Sie müssen, wie bei besonders hochwertigen Produkten üblich, mit Sorgfalt behandelt und entsprechend gepflegt werden. Bei jedem George-Element, das mit Baxter Leder gefertigt wird, ist das Pflege- und Wartungsset im Lieferumfang enthalten. / *Cuir* peau entière, pleine fleur, traités avec tannage et procédés spéciaux qui exaltent l'aspect du cuir « vécu » et la souplesse. Les cuirs Baxter sont uniques, irrépétables exactement comme les produits Falper. Ils doivent être traités avec attention et soignés comme il se doit pour des produits de valeur. En dotation avec chaque élément George avec finition en cuir Baxter le kit vanity pour le soin et l'entretien. / Pieles enteras de primera flor, tratadas mediante curtido y especiales procedimientos que acentúan el efecto envejecido y la suavidad. Las pieles Baxter son únicas e irrepitibles, exactamente como los productos Falper. Deben ser tratadas con cuidado, como corresponde a los productos de gran valor. Con cada artículo George con acabado de piel Baxter, se entrega un vanity kit para su cuidado y mantenimiento.

Per le finiture in Cat. 6 i campioni contenuti nelle cartelle colori sono da considerarsi puramente indicativi e non vincolanti per tono, colore e uniformità della finitura / *For Cat. 6 finishings the samples contained in the color charts are purely indicative and not binding for tone, color and uniformity of finish.* / Die Farbmuster für das Finish in der Kat.6 sind Indikativ und kann von der Struktur und Farben Abweichen. / *Pour les finitions en Cat. 6 les échantillons contenus dans les dossiers couleurs sont purement indicatifs et non contraignants en ce qui concerne leur teinte, couleur et l'uniformité de la finition.* / Para los acabados en Cat. 6 las muestras contenidas en las carpetas de colores deben considerarse indicativas y no vinculantes por tono, color y uniformidad del acabado.

CRISTALPLANT BIOBASED / CERAMILUX SSL

Biobased

30% di resine vegetali OGM free.

30% of vegetable resins GMO free.

Recyclable

Riciclabile e riutilizzabile come inerte.

Recyclable and reusable as inert material.

Lightweight

Peso ridotto del 30% minori emissioni di CO2.

30% weight reduction reduced CO2 emissions.

Durable

5 anni di garanzia.

5 years warranty.

Fire resistant

Reazione al fuoco classe 1.

Class 1 fire rating.

Easy maintenance

Bruciature sigaretta facilmente ripristinabili.

Cigarette burns easily renewable.

Anti-yellowing

Resistenza alla luce 1000 h Xenon.

Light resistance 1000 h xenon lamp.

Resistant to thermal shock

UNI 9429:1989 nessuno difetto.

UNI 9429:1989 no flaws.

Repairable

Graffi e rotture facilmente ripristinabili.

Scratches and breaks easily renewable.

No-stain

Macchie facilmente ripristinabili.

Stains easily renewable.

Non-toxic

Ipoallergenico e atossico.

Hypoallergenic and non-toxic.

Certified quality

Certificato per USA e CANADA e per Europa.

Certification for USA and Canada and for Europe.

Greenguard Gold

Origine BIO e emissione sostanze volatili certificata da UL.

Bio origins and emission of volatile substances certified by UL.

CERAMILUX

Recyclable

Riciclabile e riutilizzabile come inerte.

Recyclable and reusable as inert material.

Durable

5 anni di garanzia.

5 years warranty.

Fire resistant

Reazione al fuoco classe 1.

Class 1 fire rating.

Easy maintenance

Bruciature sigaretta facilmente ripristinabili.

Cigarette burns easily renewable.

Anti-yellowing

Resistenza alla luce 1000 h Xenon.

Light resistance 1000 h xenon lamp.

Resistant to thermal shock

UNI 9429:1989 nessuno difetto.

UNI 9429:1989 no flaws.

Repairable

Graffi e rotture facilmente ripristinabili.

Scratches and breaks easily renewable.

No-stain

Macchie facilmente ripristinabili.

Stains easily renewable.

Non-toxic

Ipoallergenico e atossico.

Hypoallergenic and non-toxic.

Certified quality

Certificato per USA e CANADA e per Europa.

Certification for USA and Canada and for Europe.

Per informazioni su materiali utilizzati e loro cura e manutenzione vedi pag. 676 / For information on the materials used and their care and maintenance see page 676 / Für Informationen zu den verwendeten Materialien sowie ihrer Pflege und Instandhaltung siehe S. 676 / Pour des informations sur les matériaux utilisés et leur soin et entretien, voir page 676 / Para informaciones sobre materiales utilizados y sobre su cuidado y mantenimiento, véase pág. 676

Recyclable

Riciclabile e riutilizzabile come inerte.

Recyclable and reusable as inert material.

Durable

5 anni di garanzia.

5 years warranty.

Fire resistant

Reazione al fuoco classe 1.

Class 1 fire rating.

Easy maintenance

Bruciature sigaretta facilmente ripristinabili.

Cigarette burns easily renewable.

Anti-yellowing

Resistenza alla luce 1000 h Xenon.

Light resistance 1000 h xenon lamp.

Resistant to thermal shock

UNI 9429:1989 nessuno difetto.

UNI 9429:1989 no flaws.

Repairable

Graffi e rotture facilmente ripristinabili.

Scratches and breaks easily renewable.

No-stain

Macchie facilmente ripristinabili.

Stains easily renewable.

Non-toxic

Ipoallergenico e atossico.

Hypoallergenic and non-toxic.

Certified quality

Certificato per USA e CANADA e per Europa.

Certification for USA and Canada and for Europe.

Estructura grifo en acero inoxidable Aisi 316L, acabados acero cepillado o negro mate

3 Leve miscelatore idroprogressivo o rubinetto calda / fredda in acciaio inox Aisi 316L con sistema di serraggio a scomparsa
Handles for hydroprogressive mixer or hot / cold water tap in aisi 316L stainless steel with retractable tightening system.

Hebel für hydroprogressiven Mischer oder Warm- und Kaltwasserventile aus Edelstahl Aisi 316 mit versenkbarem Klemmsystem

Poignées pour mélangeur hydroprogressif ou robinet pour eau chaude / froide en acier inox Aisi 316L avec système de serrage rétractable.

Manetas del mezclador hydroprogressivo oder válvulas agua fría y caliente en acero inoxidable Aisi 316L con sistema de apriete retráctil

4 Miscelatore idroprogressivo o vitone ceramico da incasso a parete o da piano
Wall mounted or deck mounted hydroprogressive mixer or recessed ceramic upperpart.

Hydroprogressiver Mischer oder Warm- und Kaltwasserkeramikventilen für Wand- oder Waschtischmontage

Mélangeur hydroprogressif ou tête céramique à encastrer au mur ou à poser.

Mezclador hydroprogressivo o válvulas ceramica agua fría y caliente de repisa o a pared

5 Parti da incasso in acciaio inox Aisi 316L / ottone con sistema di registrazione della distanza comando parete
Recessed parts in aisi 316L stainless steel / brass with recording system of the distance between the control and the wall.

Einbauelemente aus Edelstahl 316L/Messing mit Regelsystem des Abstands zwischen Hebelmischer und Wand

Parties à encastrer en acier inox aisi 316L / laiton avec système d'enregistrement de la distance entre la commande et le mur.

Elementos empotrados en acero inox Aisi 316L/latón con sistema de regulación de la distancia entre mando y pared

6 Gruppo termostatico a due vie ad alta portata con valvole di non ritorno e filtri
High flow capacity thermostatic group with non-return valves and filters.

Thermostatische Zweilochduschbatterie mit Hochdurchfluss, Sperrventile und Filter

Groupe thermostatique haute portée avec valves de non retour et filtres.

Grupo grifería termostatico de ducha bimando a alto flujo, válvulas de retención y filtros

7 Piastra in acciaio inox Aisi 316L per installazione con filtri ispezionabili
Plate in aisi 316L stainless steel for installation with inspectionable filters.

Metallplatte aus Edelstahl Aisi 316L für Filterinspektion

Plaque en acier inox aisi 316L pour installation avec filtres inspectionnables.

Placa metalica para inspección filtros

COM'È FATTO | HOW IS IT MADE

| WIE IST ES AUFGEBAUT | COMMENT EST-IL FAIT | CÓMO ESTÁ REALIZADO

1 Bocche di erogazione in acciaio inox Aisi 316L spazzolato, o verniciato bianco e nero opaco

Spouts in brushed or matt white and black Aisi 316L stainless steel.

Ausläufe aus Edelstahl Aisi 316L. Farben: gebürstete Stahl, matt weiß und matt schwarz

Becs en acier inox Aisi 316L brossé ou laqué blanc et noir mat.

Caños en acero inoxidable Aisi 316L, acabado acero cepillado, blanco y negro mate

2 Comando in acciaio inox Aisi 316L spazzolato o verniciato bianco o nero opaco

Flow control in brushed or matt white or black Aisi 316L stainless steel.

Hebelmischer aus Edelstahl Aisi 316L. Farben: gebürstete Stahl, matt weiß und matt schwarz

Commande en acier inox Aisi 316L brossé ou laqué blanc ou noir mat.

Mandos en acero inoxidable Aisi 316L, acabados acero cepillado, blanco mate y negro

3 Comando a parete e da piano con miscelatore idroprogressivo, con miscelatore tradizionale e con vitone ceramico calda / fredda

Wall and deck mounted flow control with hydroprogressive mixer, traditional mixer and ceramic upperpart for hot/cold water.

Wand- und Waschtischhebelmischer mit hydroprogressivem Mischer, traditionellem Mischer oder Warm- und Kaltwasserkeramikventilen

Commande au mur et à poser avec mélangeur hydroprogressif, avec mélangeur traditionnel et avec tête céramique pour eau chaude / froide.

Mandos a pared o de repisa con mezclador hydroprogressivo, mezclador tradicional o válvulas ceramica agua fría y caliente

5

4 Parti da incasso in acciaio inox Aisi 316L / ottone con sistema di registrazione della distanza comando parete

Recessed parts in Aisi 316L stainless steel / brass with recording system of the distance between the control and the wall.

Einbauelemente aus Edelstahl 316L/Messing mit Regelsystem des Abstands zwischen Hebelmischer und Wand.

Parties à encastrer en acier inox aisi 316L / laiton avec système d'enregistrement de la distance entre la commande et le mur.

Elementos empotrados en acero inox Aisi 316L/latón con sistema de regulación de la distancia entre mando y pared

5 Gruppo termostatico a due vie ad alta portata con valvole di non ritorno e filtri

High flow capacity thermostatic group with non-return valves and filters.

Thermostatische Zweilochduschbatterie mit Hochdurchfluss, Sperrventile und Filter.

Groupe thermostatique haute portée avec valves de non retour et filtres.

Grupo grifería termostatico de ducha bimando a alto flujo, válvulas de retención y filtros

NO DAMAGES

Test sui nostri top e mobili in legno sono stati eseguiti secondo le norme **Uni EN 12720/99** e **UNI 10460/95** e hanno dimostrato la perfetta tenuta delle superfici, con valutazione 5, in una scala da 1 a 5. I test prevedono l'esposizione all'acqua, caffè, acido acetico (soluzione acquosa al 10% e al 4,4%), succo di ribes nero, acido citrico (soluzione acquosa al 10%), agente detergente, disinfettante, inchiostro per timbri, etanolo non denaturato (soluzione acquosa al 48%), per 16 ore consecutive. Eventuali danneggiamenti possono tuttavia essere causati da eccessivo uso e stagnazione di acqua e saponi.

*These tests were performed on our wooden worktops and furniture surfaces according to norms **UNI EN 12720/99** and **UNI 10460/95** and showed that the tested surfaces are perfectly waterproof – 5 in a scale from 1 to 5. The tests included exposure to water, coffee, acetic acid (water solution at 10 and 4.4%), blackcurrant juice, citric acid (water solution at 10%), a detergent agent, a disinfectant solution, paint for stamps, non-denatured ethanol (water solution at 48%), for 16 consecutive hours. Any eventual damage caused might be due to excessive use and stagnation of water and soaps.*

Die an unseren aus Holz gefertigten Tops und Möbel erfolgten Tests wurden gemäß **UNI EN 12720/99** und **UNI 10460/95** ausgeführt und bewiesen die perfekte Abdichtung der Oberflächen mit Bewertung 5 innerhalb einer Skala von 1 bis 5. Diese Tests sehen das 16 Stunden lang andauernde Aussetzen der Flächen an Wasser, Kaffee, Essigsäure (10%ige und 4,4%ige wässrige Lösung), schwarzen Johannisbeersaft, Zitronensäure (10%-ig wässrige Lösung), Reinigungsmittel, Desinfektionsmittel, Stempeltinte, nicht denaturierten Ethanol (48%ige wässrige Lösung) vor. Eventuelle Schäden können jedoch durch übermäßige Nutzung und Stagnation von Wasser und Seife verursacht werden.

*Nos dessus et meubles en bois ont été soumis à des tests selon les normes **Uni EN 12720/99** et **UNI 10460/95**, qui ont démontré la parfaite tenue des surfaces, avec évaluation 5 sur une échelle de 1 à 5. Les tests prévoient l'exposition à l'eau, au café, à l'acide acétique (solution aqueuse à 10 % et à 4,4 %), au jus de groseille ou cassis, à l'acide citrique (solution aqueuse à 10 %), à un produit détergent désinfectant, à l'encre pour tampons et timbres, à l'éthanol non dénaturé (solution aqueuse à 48 %), pendant 16 heures consécutives. Des éventuels dommages peuvent toutefois être causés par une utilisation et une stagnation d'eau et de savons excessives.*

Se han ejecutado pruebas en nuestras encimeras y muebles de madera según las normas **Uni EN 12720/99** y **UNI 10460/95** que han demostrado una resistencia perfecta de las superficies obteniendo una valuación de 5 respecto de una escala de 1 al 5. Las pruebas prevén la exposición al agua, café, ácido acético (solución acuosa al 10% y al 4,4%), zumo de grosellas negras, ácido cítrico (solución acuosa al 10%), agente detergente, desinfectante, tinta para sellos, etanol no desnaturado (solución acuosa al 48%), durante 16 horas consecutivas. Sin embargo, las superficies pueden presentar posibles daños por uso excesivo y estancamiento de agua y jabones.

Certificazione americana CSA / CSA American certification / Amerikanische Zertifizierung CSA / Certification americaine CSA /

Certificacion estadounidense CSA

I lavabi, le vasche ed i piatti doccia Falper hanno ottenuto la certificazione di conformità CSA B45.5-11 rilasciata dall'ente indipendente canadese CSA International Group, valida in tutto il Nord America (Usa e Canada). Per ottenere questa importante certificazione ogni prodotto viene sottoposto a controlli e test rigorosi (resistenza all'urto, al carico, allo shock termico, assorbimento dell'acqua e altri); i controlli sono poi ripetuti periodicamente.

*Falper sinks, bathtubs and shower trays are certified as **CSA B45.5-11** compliant by the independent Canadian certification and testing organisation CSA International Group recognized across North America (USA and Canada).*

This widely acknowledged certification is granted after subjecting each product to strict inspections and testing (including

impact and load resistance testing, thermal shock test, water absorption test), which are then repeated on a regular basis.

Die Waschbecken, Badewannen und Duschwannen von Falper erhielten seitens der unabhängigen kanadischen Einrichtung „CSA International Group“ die Zertifizierung bezüglich der Konformität **CSA B45.5-11**, die in ganz Nordamerika (USA und Kanada) gültig ist.

Um diese wichtige Zertifizierung zu erhalten, wird jedes Produkt strengen Kontrollen und Prüfungen (Stoßfestigkeit, Belastungsbeständigkeit, Temperaturwechsel, Wasseraufnahme und andere) unterzogen: Diese Kontrollen werden in regelmäßigen Abständen wiederholt.

Les lavabos, les baignoires et les receveurs de douche Falper ont obtenu la certification de conformité **CSA B45.5-11** délivrée par l'organisme indépendant canadien CSA International Group, valable en Amérique du Nord (États-Unis d'Amérique et Canada).

Pour obtenir cette certification importante chaque produit est soumis à des contrôles et tests sévères, à savoir : résistance au choc, à la charge, au choc thermique, à l'absorption d'eau etc. Les contrôles sont répétés périodiquement.

Los lavabos, las tinas y los platos ducha de Falper han obtenido la certificación de conformidad **CSA B45.5-11** emitida por el ente independiente canadiense CSA International Group, válida en toda América del Norte (EEUU y Canadá).

Para obtener esta importante certificación, cada producto ha sido sometido a rigurosos controles y pruebas (tales como: resistencia a los golpes, a la carga, al shock térmico y a la absorción del agua, entre otros). Estos controles luego vienen repetidos periódicamente.

Garanzia 5 anni su Cristalplant Biobased / Warranty 5 years on biobased Cristalplant / Garantie 5 Jahre auf Cristalplant Biobased / Garantie 5 ans sur Cristalplant BioBased / Garantía 5 años en Cristalplant Biobased

Grazie alla continua e attenta ricerca applicata nel campo delle materie prime evolute, unita alla costante e ininterrotta volontà di miglioramento, Falper presenta il **CRISTALPLANT® biobased**, il primo solid surface eco-sostenibile, derivante da materie prime resinose di origine vegetale miscelate a minerali inerti naturali di estrema purezza.

CRISTALPLANT® biobased ha tutti i titoli per definirsi un prodotto eco-sostenibile dato che: il 30% della resina precedentemente di origine fossile è stata sostituita da poliesteri di origine vegetale derivanti da coltivazioni certificate; il 60% della composizione è ricavata dall'idrato di alluminio, che è un sottoprodotto della lavorazione della Bauxite per l'estrazione dell'alluminio; può essere riciclato e riutilizzato a fine vita come inerte; è ripristinabile al 100% anche con superficie graffiata, macchiata o bruciata (eco-sostenibilità); è prodotto al 100% in Italia; è riparabile tramite il KIT apposito.

CRISTALPLANT® biobased ha già ottenuto riconoscimenti e certificazioni a livello internazionale tra cui **ECV** (Environmental Claim Validation) da Underwriters Laboratories (UL) per il contenuto di materie prime di origine BIO e il contenuto percentuale di materie prime facilmente rinnovabili; **GreenGuard Indoor Air Quality Certification** da GreenGuard Environmental Institute (GEI), per il contenuto di VOC (composti organici volatili).

Questi riconoscimenti permettono di ottenere un punteggio più alto durante la certificazione LEED (Leadership in Energy and Environmental Design) di un edificio: per quanto riguarda la qualità dell'aria all'interno degli edifici, GEI è l'unico istituto riconosciuto a livello mondiale e per il contenuto di materie prime di origine BIO è necessario un livello minimo del 5% quando in Cristalplant Biobased il valore medio è superiore al 12%.

Tutti i nostri prodotti in Cristalplant saranno fabbricati con il nuovo materiale Bio-based ed avranno una garanzia speciale di 5 anni.

*Thanks to the continuous and careful applied research in the field of advanced raw materials, and the nonstop and steady improvement will, Falper presents **CRISTALPLANT® bio-based**, the first eco-sustainable solid surface, rose from vegetable origin resins mixed to extremely*

*pure natural inert filler. We can define **CRISTALPLANT® bio-based** an eco-sustainable product because: 30% of previously resin from fossil origin, now come from vegetable origin polyester resins; 60% of mixture come from tri-hydrate aluminium, a by-product of Bauxite process for aluminium extraction; it can be recycled and re-used as inert at the end of its life; it has a reduced 30% specific weight, so it produces a minor quantity of CO2 in comparison with similar products, and, not less important, the handling and installation are easier; 100% renewable, also with a scratched, stained or burned surface (eco-sustainability); 100% made in Italy; - repairable with specific KIT. Cristalplant Biobased has already obtained important international agreements and certifications: **ECV** (Environmental Claim Validation) from Underwriters Laboratories (UL) for Biobased content and percentage of rapidly renewable content; **GreenGuard Indoor Air Quality Certification** from GreenGuard Environmental Institute (GEI), for VOC's (volatile organic compound) content. These agreements allow to obtain a greater score during a building LEED (Leadership in Energy and Environmental Design) certification: for the indoor air quality the only worldwide recognized Institute is the GEI and the Biobased content will be at minimum 5% where in Cristalplant Biobased the average content is more than 12%. **All our Cristalplant products will be manufactured with the new Bio-based material, with 5 years of international warranty.***

Dank der kontinuierlichen und sorgfältigen Forschung im Bereich der modernen Werkstoffe, verbunden mit dem konstanten und kontinuierlichen Streben nach Verbesserung, präsentiert Falper **CRISTALPLANT® biobased**, das erste «Solid Surface» mit ökologischer Nachhaltigkeit aus nachwachsenden harzgebundenen Rohstoffen pflanzlichen Ursprungs und durchsetzt mit Gesteinwerkstoffen von extremer Reinheit.

CRISTALPLANT® biobased erfüllt alle Voraussetzungen, um als ökologisch nachhaltiges Produkt definiert werden zu können, denn: 30% des zuvor aus fossilem Ursprung gewonnenen Harzes wurde durch Polyester pflanzlicher Herkunft ersetzt, die aus zertifizierten Anpflanzungen gewonnen werden, 60% der Zusammensetzung stammen aus Aluminiumhydrat, einem Nebenprodukt der Verarbeitung von Bauxit bei der Gewinnung von Aluminium. Es kann recycelt und am Lebensende als Zuschlagstoff wiederverwendet werden und lässt sich auch bei verkratzter, fleckiger oder verbrannter Oberfläche (ökologische Nachhaltigkeit) zu 100% wieder in den ursprünglichen Zustand rücksetzen. Ein vollständig in Italien hergestelltes Produkt, das unter Anwendung des entsprechenden Kits repariert werden kann.

Das bisobasierende **CRISTALPLANT®** hat aufgrund seines Gehalts an Rohstoffen BIO-Ursprungs und des Anteils von leicht erneuerbaren Rohstoffen bereits Anerkennung und Zertifizierungen auf internationaler Ebene erhalten, darunter auch die **ECV** (Environmental Claim Validation) von Underwriters Laboratories (UL) und die **GREENGUARD Indoor Air Quality Certification** von GREENGUARD Environmental Institute (GEI) für die VOC (volatile organic compounds). Diese Auszeichnungen ermöglichen den Erhalt einer höheren Punktzahl in der LEED Zertifizierung (Leadership in Energy and Environmental Design) eines Gebäudes: Im Hinblick auf die Qualität der Luft in Gebäuden ist GEI das einzige, weltweit anerkannte Institut. Was den Gehalt an Rohstoffen mit BIO-Ursprung angeht wird ein Mindestwert von 5% gefordert und im Cristalplant Biobased liegt der entsprechende Durchschnittswert über 12%. **Alle unsere Produkte werden aus Cristalplant mit dem neuen Bio-based Material hergestellt und werden über eine spezielle Garantie von 5 Jahren verfügen.**

*Grâce à la recherche constante et méticuleuse appliquée dans le domaine des matières premières évoluées, allée à la volonté d'amélioration continue et ininterrompue, Falper présente **CRISTALPLANT® biobased**, la première surface solide éco-soutenable dérivant de matières premières résineuses d'origine végétale mélangées à des minéraux inertes naturels d'une très grande pureté. **CRISTALPLANT® biobased** peut se définir à juste titre comme un produit éco-soutenable étant donné que 30% de la résine auparavant d'origine fossile ont été remplacés par des polyesters d'origine végétale dérivant de cultures certifiées; 60% de la composition est obtenue de l'hydrate d'aluminium qui est un sous-produit du traitement de la bauxite pour l'extraction de l'aluminium. Il peut être recyclé et réutilisé en fin de vie comme produit inerte; il est 100% récupérable même avec une surface éraflée, tachée ou brûlée (éco-soutenable); c'est un produit 100% made in Italy; il est réparable avec le KIT spécial.*

CRISTALPLANT® biobased a déjà obtenu les reconnaissances et certifications au niveau international, dont **ECV** (Environmental Claim Validation) par Underwriters Laboratories (UL) pour le contenu de matières premières d'origine BIO et le contenu en pourcentage de matières premières facilement renouvelables, **GreenGuard Indoor Air Quality Certification** par GreenGuard Environmental Institute (GEI) pour le contenu de VOC (composés organiques volatils). Ces reconnaissances permettent d'obtenir un nombre de points plus élevé durant la certification LEED (Leadership in Energy and Environmental Design) d'un bâtiment: concernant la qualité de l'air à l'intérieur des bâtiments, GEI est le seul institut reconnu à l'échelle mondiale. Pour le contenu de matières premières d'origine BIO il est nécessaire d'avoir un niveau minimum de 5% quand dans Cristalplant Biobased la valeur moyenne est supérieure à 12%. **Tous nos produits en Cristalplant seront fabriqués avec le nouveau matériau Bio-based et bénéficieront d'une garantie spéciale de 5 ans.**

Gracias a la continua y atenta investigación aplicada en el campo de las materias primas avanzadas, junto con la constante e ininterrompida voluntad de mejoramiento, Falper presenta el **CRISTALPLANT® biobased**, el primer solid surface eco-sostenible, que deriva de materias primas resinosas de origen vegetal mezcladas con minerales inertes naturales de extrema pureza. **CRISTALPLANT® biobased** tiene todas las características para ser definido un producto eco-sostenible puesto que: el 30% de la resina anteriormente de origen fósil ha sido sustituida por poliésteres de origen vegetal que derivan de cultivos certificados; el 60% de la composición es obtenida del hidrato de aluminio, que es un subproducto de la elaboración de la Bauxita para la extracción del aluminio; se puede reciclar y reutilizar al final de su vida útil como inerte; 100% renovable incluso con superficie rayada, manchada o quemada (eco-sostenibilidad); es fabricado 100% en Italia; se puede reparar con el KIT específico. **CRISTALPLANT® biobased** ya ha obtenido reconocimientos y certificaciones a nivel internacional entre las cuales podemos mencionar **ECV** (Environmental Claim Validation) otorgada por Underwriters Laboratories (UL) para el contenido de materias primas de origen BIO y el contenido porcentual de materias primas fácilmente renovables; **GreenGuard Indoor Air Quality Certification** otorgada por GreenGuard Environmental Institute (GEI), para el contenido de VOC (compuestos orgánicos volátiles). Estos reconocimientos permiten obtener una puntuación más alta durante la certificación LEED (Leadership in Energy and Environmental Design) de un edificio: en lo que concierne a la calidad del aire en el interior de los edificios, GEI es el único instituto reconocido a nivel mundial y para el contenido de materias primas de origen BIO es necesario un nivel mínimo del 5% mientras que en Cristalplant Biobased el valor promedio es superior al 12%. **Todos nuestros productos en Cristalplant serán fabricados con el nuevo material Bio-based y tendrán una garantía especial de 5 años.**

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

MATERIALI COSTRUTTIVI UTILIZZATI NEI MOBILI FALPER / CONSTRUCTION MATERIALS USED IN FALPER FURNITURE / KONSTRUKTIONSMATERIALIEN, DIE IM INNEREN DER MÖBEL VON FALPER ZUM EINSATZ KOMMEN / MATÉRIAUX DE CONSTRUCTION UTILISÉS DES MEUBLES FALPER / MATERIALES DE CONSTRUCCIÓN INTERNOS UTILIZADOS EN LOS MUEBLES FALPER

Multistrato di betulla AW 100 – mobili in finitura legno / AW 100 birch plywood – wood finish furniture

Birkenschichtholz AW 100 – Möbel mit Holzoberfläche / Contreplaqué de bouleau AW 100 – meubles en finition bois / Multicapa de abedul AW 100 – muebles con acabado de madera

Il legno multistrato di betulla, impiallacciato in rovere e noce canaletto, è utilizzato per la fabbricazione di tutti i componenti dei mobili finitura legno Cat.2 I pannelli sono realizzati con incollaggio AW 100 per ambienti umidi e l'incollaggio delle bordature in essenza è realizzato con colle poliuretatiche resistenti all'acqua. Tutti i pannelli sono classificati E1 per la bassa emissione di formaldeide e su richiesta dispongono di certificazione CARB.

Birch plywood, in oak and black walnut veneer, is used to make all the parts of the Cat.2 wood finish furniture. The panels are made with AW 100 gluing for damp environments and gluing of the edges in essence and made with polyurethane water resistant materials. All the panels are E1 classified for low formaldehyde emission and on request are CARB certified.

Das Birkenschichtholz furniert mit Eiche und Nussbaum Canaletto wird zur Herstellung aller Möbelteile mit Oberfläche aus Holz der Kat. 2 verwendet. Die Platten werden mit Verleimung AW 100 für feuchte Umgebungen und Verleimung der Kantenleisten aus Holz mit wasserbeständigen PU-Klebstoffen realisiert. Alle Platten entsprechen der Klasse E1 für geringe Formaldehydemission und verfügen auf Anfrage über die CARB-Zertifizierung.

Le bois contreplaqué de bouleau, plaqué en chêne et noyer d'Amérique, est utilisé pour la fabrication de tous les composants des meubles finition bois Cat.2. Les panneaux sont réalisés avec collage AW 100 pour environnements humides et collage des bordures en bois avec des colles en polyuréthane résistantes à l'eau. Tous les panneaux sont de classe E1 pour leur faible émission de formaldéhyde et disposent, sur demande, de certification CARB.

La madera multicapa de abedul, contrachapada de roble y nogal negro, está utilizada para la fabricación de todos los componentes de los muebles con acabado de madera Cat.2. Los paneles están realizados con encolado AW 100 para ambientes húmedos y el encolado de los rebordes de madera está realizado con colas poliuretánicas resistentes al agua. Todos los paneles están clasificados E1 por la baja emisión de formaldehído y bajo pedido disponen de certificación CARB.

Idropan V100 idrofugo – strutture mobili laccati / V100 water repellent Idropan – lacquered furniture structures

Idropan V100 wasserabweisend – lackierte Möbelteile / Idropan V100 hydrofuge – structures meubles laqués

Questo tipo di pannello viene utilizzato per la struttura dei mobili in finitura laccata. Realizzato in agglomerato di legno ecologico, idrofugo e ad alta densità, Idropan garantisce ottima resistenza meccanica, perfetta planarità e resistenza all'umidità. Le bordature sono effettuate con incollaggio poliuretano. I pannelli sono certificati in classe E1 per la bassa emissione di formaldeide e su richiesta dispongono di certificazione CARB.

This type of panel is used for the structure of lacquer finished furniture. Made in environmentally friendly, high density water repellent wood agglomerate, Idropan guarantees excellent mechanical resistance, perfect flatness and resistance to humidity. The edges are made with polyurethane gluing. The panels are E1 certified for low formaldehyde emission and on request are CARB certified.

Diese Art von Platte wird für die Konstruktion von Möbeln mit lackierter Oberfläche verwendet. Realisiert aus umweltfreundlichem, wasserabweisendem und hoch dichtem Spanholz garantiert Idropan hervorragende mechanische Beständigkeit, perfekte Planheit und Feuchtigkeitsbeständigkeit. Die Kantenleisten sind mit PU-Klebstoffen verleimt. Die Platten entsprechen der Klasse E1 für geringe Formaldehydemission und verfügen auf Anfrage über die CARB-Zertifizierung.

Ce type de panneau est utilisé pour la structure des meubles en finition laquée. Réalisé en aggloméré de bois écologique, hydrofuge et à haute densité, Idropan garantit une résistance mécanique optimale, une planéité parfaite et une résistance à l'humidité. Les bordures sont collées avec une colle polyuréthane. Les panneaux sont certifiés classe E1 pour la faible émission de formaldéhyde et disposent, sur demande, de certification CARB.

Este tipo de panel es utilizado para la estructura de los muebles con acabado barnizado. Realizado en conglomerado de madera ecológica, impermeable y de alta densidad, Idropan garantiza una óptima resistencia mecánica, una perfecta cualidad de plano y resistencia a la humedad. Los rebordes están realizados con encolado poliuretánico. Los paneles están certificados con clase E1 por la baja emisión de formaldehído y bajo pedido disponen de certificación CARB.

MDF – frontali mobili laccati / MDF – lacquered furniture fronts

MDF – lackierte Möbelfronten / MDF – façades meubles laqués / MDF – frontales muebles barnizados

L'utilizzo di MDF idrofugo ad alta pressione è riservato alle ante ed ai frontali laccati, dove la planarità superficiale della laccatura richiede una superficie di fondo perfettamente speculare, caratteristica questa che si ottiene solamente con l'MDF. I pannelli utilizzati sono certificati in classe E1 per la bassa emissione di formaldeide e su richiesta sono disponibili con certificazione CARB. Tutti i componenti sono protetti da un fondo di vernice poliesteri ad alta resistenza, prima della laccatura lucida o opaca.

The use of high pressure water repellent MDF is reserved for the lacquered doors and fronts where the surface flatness of the lacquering requires a perfectly specular surface, a characteristic that is achieved only with MDF. The panels used are E1 certified for low formaldehyde emission and on request are available with CARB certification. All the parts are protected by a high resistance polyester varnish base before glossy or matt lacquering.

Die Verwendung von wasserabweisendem Hochdruck-MDF ist den lackierten Türen und Fronten vorbehalten, bei denen für die Lackierung ein perfekt ebener und spiegelbildlicher Untergrund erforderlich ist – eine Eigenschaft die man nur mit MDF erhält. Die verwendeten Platten entsprechen der Klasse E1 für geringe Formaldehydemission und verfügen auf Anfrage über die CARB-Zertifizierung. Alle Komponenten werden vor der glänzenden oder matten Lackierung mit einem hoch widerstandsfesten Polyesterlack grundiert.

L'utilisation de MDF hydrofuge à haute pression est réservée aux vantaux et aux façades laquées où la surface plane du laquage requiert une base parfaitement spéculaire, caractéristique qui s'obtient seulement avec le MDF. Les panneaux utilisés sont certifiés classe E1 pour la faible émission de formaldéhyde et disposent, sur demande, de certification CARB. Tous les composants sont protégés par une base en peinture polyester haute résistance, avant le laquage brillant ou mat.

El uso de MDF impermeable de alta presión está reservado a las hojas y frontales barnizados, donde la cualidad de plano superficial del barnizado requiere una superficie de base perfectamente especular, una característica que se obtiene solamente con el MDF. Los paneles utilizados están certificados con clase E1 por la baja emisión de formaldehído y bajo pedido se encuentran disponibles con certificación CARB. Todos los componentes están protegidos por una base de pintura de poliéster de alta resistencia, antes de aplicar el barniz brillante u opaco.

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

MATERIALI FINITI E FINITURE / FINISHED MATERIALS AND FINISHING / FERTIGE MATERIALIEN UND BEHANDLUNGEN / MATÉRIAUX FINIS ET FINITIONS / MATERIALES ACABADOS Y ACABADOS SUPERFICIALES

Ante in Polimerico - melaminico / Polimeric - melamine doors / Polimer - Melamintüren / Portes en mélamine - polymère / Puertas poliméricas - de melamina

Le ante realizzate con questo processo sono in MDF ad alta pressione e sono realizzate con film in PVC / PET a triplo strato con bisellatura e sistema a doppia pressata brevettato da Falper. Questo procedimento consente di ottenere un effetto massello laccato opaco soft touch, con un sensibile risparmio di costi e un ottimo risultato qualitativo estetico e di resistenza.

Polymeric / melamine doors (characteristics)

The doors made with this process are made of high-pressure MDF and with a triple-layer PVC / PET film with chamfering and a double-press system patented by Falper. This procedure makes it possible to obtain a matt soft touch lacquered solid effect, with a significant cost saving and an excellent aesthetic and resistance quality result.

Die mit diesem Verfahren hergestellten Türen bestehen aus Hochdruck-MDF und sind aus dreilagiger PVC / PET-Folie mit Abschrägung und einem von Falper patentierten Doppelpressensystem hergestellt. Dieses Verfahren ermöglicht den Erhalt eines matten Soft-Touch-Lackeffekts mit erheblichen Kosteneinsparungen und einer hervorragenden ästhetischen und beständigen Qualitätsqualität.

Les portes fabriquées selon ce processus sont en MDF haute pression et en film PVC / PET triple couche avec chanfreinage et système à double pression breveté par Falper. Cette procédure permet d'obtenir un effet massif laqué mat doux au toucher, avec une économie de coût significative et un excellent résultat de qualité esthétique et de résistance.

Las puertas hechas con este proceso están hechas de MDF de alta presión y están hechas de película de PVC / PET de triple capa con chafán y un sistema de doble prensa patentado por Falper. Este procedimiento permite obtener un efecto sólido lacado suave al tacto mate, con un ahorro de costos significativo y un excelente resultado de calidad estética y resistencia.

Ante in polimerico - melaminico (cura e manutenzione) / Polimeric - melamine doors (care and maintenance) / Polimer - Melamintüren (Pflege und Wartung) / Portes en mélamine - polymère (entretien et maintenance) / Puertas poliméricas - de melamina (cuidado y mantenimiento)

Particolarmente resistenti al graffio e all'esposizione ai raggi UV, questi elementi

Pulire con un panno umido con acqua tiepida e detergente delicato. Per macchie ostinate usare panno umido non abrasivo e detersivi per la casa non abrasivi.

These elements are particularly resistant to scratches and exposure to UV rays.

Wipe with a damp cloth with warm water and a mild detergent. For stubborn stains, use a non-abrasive wet cloth and non-abrasive household cleaners.

Diese Elemente sind besonders widerstandsfähig gegen Kratzer und UV-Strahlen.

Mit einem feuchten Tuch mit warmem Wasser und einem milden Reinigungsmittel abwischen. Verwenden Sie für hartnäckige Flecken ein nicht scheuerndes, feuchtes Tuch und nicht scheuernde Haushaltsreiniger.

Essuyez avec un chiffon humide avec de l'eau tiède et un détergent doux.

Pour les taches rebelles, utilisez un chiffon humide non abrasif et de nettoyeurs ménagers non abrasifs.

Estos elementos son particularmente resistentes a los arañazos y la exposición a los rayos UV.

Limpie con un paño húmedo con agua tibia y un detergente suave. Para manchas difíciles, use un paño húmedo no abrasivo y limpiadores domésticos no abrasivos.

Laccature lucide Cat .3 / Cat. 3 glossy lacquering / Glänzende Lackierungen Kat .3 / Laquages brillants Cat.3 / Barnizados brillantes Cat .3

Il processo di laccatura lucida Falper avviene su fondo poliesteri, esente da stirolo, che garantisce il perfetto e persistente aggrappaggio delle vernici, anche in presenza di ambienti umidi. Successivamente al fondo poliesteri viene spruzzato un doppio strato di laccatura diretta, rispettando i tempi di essiccazione che avvengono, come la verniciatura, in ambiente protetto e pressurizzato a temperatura costante. Questo procedimento manuale di laccatura garantisce una corretta e uniforme presenza di vernice su tutto il manufatto e una eccellente e duratura brillantezza, senza le riduzioni di spessore tipiche delle verniciature spazzolate. La laccatura diretta richiede una altissima cura e capacità nella realizzazione.

The Falper glossy lacquering process takes place on a polyester, styrol-free base which guarantees perfect and persistent holding for the varnishes, even in damp environments. After the polyester base a double coat of direct lacquering is sprayed in compliance with the drying times which is carried out, like the varnishing, in a protected and pressurised environment at a constant temperature. This manual lacquering procedure guarantees a correct and uniform presence of varnish over the entire product and long lasting shine, without reducing the thickness typical of brushed varnishing. Direct lacquering requires a high level of care and skill to carry out.

Das Verfahren zur glänzenden Lackierung von Falper erfolgt auf einer styrolfreien Polyestergrundierung, die eine perfekte und lang anhaltende Haftung des Lacks auch in feuchten Räumen garantiert. Nach der Grundierung mit dem Polyesterlack wird eine doppelte Lackschicht direkt aufgespritzt. Lackierung und Trocknung erfolgen in einem geschützten Raum und unter Druck bei konstanter Temperatur. Dieses manuelle Lackierverfahren garantiert eine korrekte und gleichmäßige Lackverteilung auf dem gesamten Werkstück sowie einen exzellenten und dauerhaften Glanz ohne die Verringerung der Stärke, wie sie bei Lackierungen mit Bürsten typisch ist. Die Lackierung erfordert höchste Sorgfalt und Kompetenz in der Ausführung.

Le processus de laquage brillant Falper se fait sur une base en polyester, sans styrène, qui garantit la tenue parfaite et durable des peintures, même en présence d'environnements humides. On vaporise ensuite sur la base en polyester une double couche de laquage direct en respectant les temps de séchage qui a lieu, comme pour la peinture, dans un espace protégé et pressurisé à température constante. Ce procédé manuel de laquage garantit la présence correcte et uniforme de peinture sur tout le produit manufacturé et une brillance excellente et durable sans les réductions d'épaisseur typiques des peintures brossées. Le laquage direct nécessite un grand soin et savoir-faire

El proceso de barnizado brillante Falper se produce sobre una base de poliéster, sin estireno, que garantiza una penetración perfecta y resistente de la pintura, incluso en presencia de ambientes húmedos. A continuación de la base de poliéster es pulverizada una doble capa de barniz directa, respetando los tiempos de secado, como la pintura, en un ambiente protegido y presurizado a temperatura constante. Este procedimiento manual de barnizado garantiza una correcta y uniforme presencia de barniz sobre toda la manufactura y un excelente y duradero brillo, sin la presencia de las reducciones de espesor típicas de las pinturas que se aplican con pincel. El barnizado directo requiere muchísimo cuidado y capacidad en la realización.

Laccature opache Cat.1 / Cat. 1 matt lacquering / Matte Lackierungen Kat.1 / Laquages mats Cat.1 / Barnizados opaco Cat.1

Il processo di laccatura opaca avviene con laccatura spray robotizzata e vernici all'acqua, su base poliestere esente da stirolo. Il tipo di fondo garantisce un perfetto aggrappaggio della vernice anche in ambienti umidi. Le superfici in finitura laccata opaca sono per loro natura particolarmente resistenti e uniformi. La finitura superficiale lievemente testurizzata risulta inoltre molto piacevole al tatto.

The matt lacquering process takes place with robotic spray lacquering and water-based varnishes on a styrol-free polyester base. The type of base guarantees perfect grip for the varnish even in damp environments. The matt lacquer finished surfaces are by nature particularly resistant and uniform. The slightly textured surface finish also has a very pleasant feel.

Das Verfahren der Mattlackierung erfolgt mit einer robotergesteuerten Sprühlackierung und Wasserlacken auf Basis von styrolfreiem Polyester. Die Art der Grundierung garantiert eine perfekte Haftung des Lacks auch in feuchten Räumen. Matt lackierte Oberflächen sind aufgrund ihrer Beschaffenheit besonders widerstandsfähig und gleichmäßig. Die leicht strukturierte Oberfläche fühlt sich zudem besonders angenehm an.

Le processus de laquage mat se fait au moyen de laquage en spray robotisé et de peintures à l'eau sur une base en polyester sans styrène. Le type de base garantit une tenue parfaite de la peinture même en environnements humides. Les surfaces en finition laquée mat sont, en raison de leur nature, particulièrement résistantes et uniformes. La finition de surface légèrement texturisée est également très agréable au toucher.

El proceso de barnizado opaco se produce con barnizado en spray robotizado y pinturas al agua, sobre una base de poliéster que carece de estireno. El tipo de base garantiza una perfecta penetración de la pintura incluso en ambientes húmedos. Las superficies con acabado barnizado opaco son por naturaleza particularmente resistentes y uniformes. El acabado superficial lievemente texturizado además es muy agradable al tacto.

Cura e manutenzione prodotti laccati / Lacquered products care and maintenance

Pflege und Instandhaltung lackierter Produkte. / Soins et entretien des produits laqués / Cuidado y mantenimiento de los productos barnizados

Pulire con un panno umido; per una pulizia più approfondita aggiungere all'acqua detersivi liquidi, sciacquare con acqua e asciugare con un panno morbido. Non utilizzare prodotti abrasivi o prodotti contenenti cloro o acetone.

Clean with a damp cloth; for more thorough cleaning, add liquid detergent to the water, rinse with water and dry with a soft cloth. Do not use abrasive products or products containing chlorine or acetone.

Mit einem feuchten Tuch reinigen; für eine gründlichere Reinigung dem Wasser flüssige Reinigungsmittel hinzufügen, mit Wasser spülen und mit einem weichen Tuch trocknen. Keine schmirgelnden Produkte oder Produkte verwenden, die Chlor oder Aceton enthalten.

Nettoyer avec un chiffon humide; pour un nettoyage plus approfondi, ajouter un détergent liquide à l'eau, rincer avec de l'eau et essuyer avec un chiffon doux. Ne pas utiliser de produits abrasifs ou de produits à base de chlore ou d'acétone.

Limpie con un trapo húmedo; para una limpieza más profunda añada detergentes líquidos al agua, enjuague con agua y seque con un paño suave. No utilice productos abrasivos o que contengan cloro y acetona.

Finiture legno Cat. 2 / Wood finishing Cat. 2 / Holzfinishes Cat. 2 / Finitions En Bois Cat. 2 / Acabado De Madera Cat. 2

Il processo di verniciatura delle superfici legno avviene con un procedimento robotizzato a tre fasi: tinta dell'impiallacciato nella finitura richiesta, applicazione del fondo di fissaggio e successivamente, finitura trasparente a zero gloss, entrambi all'acqua. La finitura ha funzione protettiva della superficie e il coefficiente zero gloss indica l'opacità della finitura che non altera le superfici naturali in legno Falper.

The varnishing process of wood surfaces takes place with a three-phase robotic procedure: colouring of the veneer in the requested finish, application of the fixing base and then zero gloss transparent finish, both water-based. The finish carries out a protective function of the surface and the zero gloss coefficient indicates the matt character of the finish which does not alter the natural surfaces in Falper wood.

Die Lackierung von Holzoberflächen erfolgt mit einem dreiphasigen robotergesteuerten Verfahren: Lackierung des Furniers in der gewünschten Farbe, Auftrag der Grundierung und anschließend des transparenten „Zero Gloss“ Lacks (beides Wasserlacke). Der transparente Lack schützt die Oberfläche und die Bezeichnung „Zero Gloss“ gibt an, dass es sich um ein mattes Produkt handelt, das nicht das Aussehen der natürlichen Holzoberflächen von Falper verändert.

La peinture des surfaces en bois se fait par un procédé robotisé en trois phases : peinture du plaqué dans la finition souhaitée, application de la base de fixation et ensuite, finition transparente à "zéro gloss", les deux réalisées à base d'eau. La finition a une fonction protectrice de la surface et le coefficient "zéro gloss" indique l'opacité de la finition qui n'altère pas les surfaces naturelles en bois Falper.

El proceso de pintura de las superficies de madera se produce con un proceso robotizado de tres fases: color del contrachapado en el acabado requerido, aplicación de la base de fijación y después, acabado transparente sin brillo, ambos al agua. El acabado tiene la función protectora de la superficie y el coeficiente cero brillo indica la opacidad del acabado que no altera las superficies naturales de la madera Falper.

Cura e manutenzione delle finiture in legno Cat.2 / Care and maintenance of finishes in Cat. 2 wood

Pflege und Instandhaltung der Holzoberflächen der Kat.2 / Soins et entretien des finitions en bois Cat.2 / Cuidado y mantenimiento de los acabados de madera Cat.2

Pulire con un panno umido; per una pulizia più approfondita utilizzare prodotti per la pulizia dei vetri che non contengano solventi e asciugare bene con un panno morbido. Non utilizzare prodotti abrasivi o prodotti contenenti cloro, solventi o acetone. Importante: le vernici usate per il legno sono idrorepellenti e non vanno rigate o sollecitate con alte temperature. Non utilizzare cere per mobili. Ricordiamo che il legno si comporta anche dopo la lavorazione come prodotto vivo mostrandosi sensibile al calore e all'umidità. Evitare il ristagno di acqua, asciugando le parti in legno dopo ogni uso.

Clean with a damp cloth; for more thorough cleaning, use solvent-free glass-cleaning products and dry well with a soft cloth. Do not use abrasive products or products that contain chlorine, solvents or acetone. Important: the paints used for wood are water-repellent, will not yellow and must not be scratched or subjected to high temperatures. Do not use furniture wax. It must be remembered that, even after treatment, wood is a living material and is therefore sensitive to heat and damp. Dry the parts in wood immediately after each use.

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

Mit einem feuchten Tuch reinigen; für eine gründlichere Reinigung Produkte für die Glasreinigung verwenden, die keine Lösungsmittel enthalten und mit einem weichen Tuch gut trocknen. Keine schmirgelnden Produkte oder Produkte verwenden, die Chlor, Lösungsmittel oder Aceton enthalten. Wichtig: die für das Holz verwendeten Lacke sind wasserabstoßend, vergilben nicht und dürfen weder verkratzt noch mit hohen Temperaturen belastet werden. Kein Möbelwachs verwenden. Wir erinnern daran, dass sich das Holz auch nach der Bearbeitung als lebendiges Produkt zeigt, das wärme- und feuchtigkeitsempfindlich ist. Vermeiden, dass sich Wasser staut, die Holzteile nach jedem Gebrauch trocknen.

Nettoyer avec un chiffon humide ; pour un nettoyage plus approfondi, utiliser un nettoyeur pour vitres exempt de solvants et bien essuyer avec un chiffon doux. Important: les peintures pour bois sont hydrofuges, ne jaunissent pas et ne doivent pas être rayées ou exposées à des températures élevées. Ne pas utiliser d'encastiques pour meubles. Nous rappelons que le bois reste un produit vivant, sensible à la chaleur et à l'humidité, même après son usinage. Éviter les dépôts d'eau, et sécher les parties en bois après chaque utilisation.

Limpie con un trapo húmedo; para una limpieza profunda utilice productos para la limpieza de cristales que no contengan solventes y seque bien con un trapo suave. No utilice productos abrasivos o que contengan cloro, solventes o acetona. Importante: las pinturas usadas para la madera son hidrófugas, no amarillean y no hay que rayarlas ni exponerlas a altas temperaturas. No utilice ceras para muebles. Le recordamos que la madera se comporta, incluso después de la elaboración, como un producto vivo, mostrándose sensible a la humedad. Evite el estancamiento del agua secando bien las partes de madera después de cada uso.

Rovere solid skin Cat. 2 / Cat. 2 solid skin oak / Eiche Solid Skin Kat. 2 / Chêne solid skin Cat. 2 / Roble solid skin (piel dura) Cat. 2

Questo speciale tipo di rovere è realizzato su multistrato di betulla AW 100 con impiallacciatura e bordatura in rovere europeo ad alto spessore. La finitura avviene tramite tinta e applicazione di olio-cera protettivi e naturali secondo un processo sviluppato dai tecnici Falper. La presenza di piccoli nodi e la finitura naturale rendono questo speciale tipo di rovere al pari di un legno un massello della stessa finitura, garantendo però maggiore flessibilità nelle dimensioni ed evitando le tolleranze e i processi di stabilizzazione tipici del legno massello.

This special type of oak is made on AW 100 birch plywood with veneer and edging in thick European oak. Finishing takes place through the colouring and application of protective and natural oil-wax following a process developed by Falper engineers. The presence of small knots and the natural finish place this special type of oak on the same level as solid wood with the same finish, but guaranteeing more flexibility in size and avoiding the tolerances and stabilisation processes typical of solid wood.

Dieses spezielle Eichenholz wird auf der Basis von Birkenschichtholz AW 100 sowie einem Furnier und Kantenleisten aus europäischer Eiche mit großer Stärke realisiert. Die Oberflächenbehandlung erfolgt durch Auftrag eines schützenden und natürlichen Wachsöls mit einem Verfahren, das speziell von den Technikern von Falper entwickelt wurde. Dank des Vorhandenseins kleiner Knoten und des natürlichen Finishes lässt sich diese spezielle Art von Eichenholz kaum von Massivholz mit derselben Oberfläche unterscheiden; zugleich garantiert sie jedoch mehr Flexibilität bezüglich der Abmessungen und verhindert die Toleranzen und Stabilisierungsprozesse, die typisch für Massivholz sind.

Ce type de chêne spécial est réalisé sur un contreplaqué de bouleau AW 100 avec placage et bordure en chêne européen à haute épaisseur. La finition est réalisée au moyen de peinture et d'application d'huile-cire protectrices et naturelles selon un processus développé par les techniciens Falper. La présence de petits nœuds et la finition naturelle permettent à ce type de chêne spécial d'être assimilé à un bois massif de la même finition en garantissant cependant une plus grande flexibilité dans les dimensions et tout en évitant les tolérances et les procédés de stabilisation typiques du bois massif.

Este tipo especial de roble está realizado sobre un multicapa de abedul AW 100 con contrachapado y reborde de roble europeo de alto espesor. El acabado se produce a través de tinta y aplicación de aceite-cera de protección y naturales basándose en un proceso desarrollado por los técnicos Falper. La presencia de pequeños nudos y el acabado natural vuelven especial a este tipo de roble al igual que una madera maciza con el mismo acabado, pero garantizando una mayor flexibilidad en las dimensiones y evitando las tolerancias y los procesos de estabilización típicos de la madera maciza.

Massello di rovere Cat. 4 / Cat. 4 solid oak / Massives Eichenholz Kat. 4 / Chêne massif Cat. 4 / Madera maciza de roble Cat. 4

I mobili in massello di rovere sono realizzati con rovere europeo massello stabilizzato ed essiccato con un procedimento della durata di tre mesi prima dell'inizio della costruzione del mobile. Il lengo viene quindi trattato con finitura a tinta e olio-cera naturali e protettivi. Il massello di rovere è soggetto alle tolleranze e ai processi di stabilizzazione dimensionale dipendenti dal grado di umidità presenti nel luogo di installazione e tipici di questo materiale naturale e pregiato. Tali tolleranze così come piccole imperfezioni devono essere considerate come parte della naturalità del materiale.

Our solid oak furniture is made with European solid oak, stabilised and dried with a three-month procedure before beginning to build the furniture. The wood is then treated with a colouring finish and natural and protective oil-wax. The solid oak is subject to the dimensional stabilisation processes depending on the degree of humidity in the installation location and typical of this natural and precious material. These tolerances, as well as small imperfections, should be considered as part of the natural character of the material.

Die Möbel aus massivem Eichenholz sind aus europäischem massivem Eichenholz gefertigt, das vor Beginn der Möbelherstellung einem dreimonatigen Stabilisierungs- und Trockenverfahren unterzogen wird. Das Holz wird mit einem Farbblack sowie einem natürlichen und schützenden Wachsöl behandelt. Massives Eichenholz unterliegt Toleranzen und Prozessen zur Maßstabilisierung, die je nach Grad der vorhandenen Feuchtigkeit am Installationsort variieren und typisch für dieses hochwertige Naturmaterial sind. Diese Toleranzen sowie kleine Schönheitsfehler müssen als Charakteristik der Natürlichkeit des Materials betrachtet werden.

Les meubles en chêne massif sont réalisés avec du chêne européen massif stabilisé et séché au moyen d'un processus qui dure trois mois avant de débiter la fabrication du meuble. Le bois est donc traité avec une finition teintée et de l'huile et de la cire naturelles et protectrices. Le chêne massif est sujet aux tolérances et aux processus de stabilisation dimensionnelle qui dépendent du niveau d'humidité présent sur le lieu d'installation et typiques de ce matériel naturel et de qualité. Ces tolérances, tout comme les petites imperfections, doivent être considérées comme faisant partie de l'aspect naturel du matériel.

Los muebles realizados en madera maciza de roble están realizados con roble macizo europeo estabilizado y secado con un procedimiento con una duración de tres meses antes de iniciar la construcción del mueble. La lenga es tratada con un acabado con color y aceite-cera naturales y protectores. La madera maciza de roble está sometida a unas tolerancias y a unos procesos de estabilización con unas dimensiones dependientes del grado de humedad presentes en el lugar de instalación y típicos de este material natural y preciado. Tales tolerancias así como pequeñas imperfecciones deben ser consideradas como parte de la naturalidad del material.

Acacia termotrattata / Heat-treated acacia / Wärmebehandelte Akazie / Acacia traité thermiquement / Acacia termotrattada

Massello di Acacia di 4 mm di spessore con trattamento eseguito portando a specifiche temperature il legno, evitando l'utilizzo di coloranti e di qualsiasi agente chimico. Il trattamento termico consente di ottenere su tutta la massa maggiore stabilità e toni di colore assolutamente inediti e naturali, influenzando sui parametri fisici, migliorandone la durevolezza in quanto si riducono le possibilità di rigonfiamenti, ritiri di volume e fuoriuscite di resina.

4 mm thick Acacia solid wood with treatment carried out bringing the wood to specific temperatures, avoiding the use of dyes and any chemical agent. The heat treatment allows to obtain on the whole mass greater stability and color tones absolutely new and natural, influencing the physical parameters, improving the durability as it reduces the chances of swelling, shrinkage of volume and leakage of resin.

4 mm starkes Akazienholz mit Behandlung, bei der das Holz auf bestimmte Temperaturen gebracht wird, ohne Farbstoffe und chemische Mittel zu verwenden. Die Wärmebehandlung ermöglicht es, auf der gesamten Masse eine größere Stabilität und Farbtöne zu erreichen, die absolut neu und natürlich sind, die physikalischen Parameter beeinflussen und die Haltbarkeit verbessern, da sie die Wahrscheinlichkeit des Anschwellens, des Volumenschumpfens und des Austretens von Harz verringert.

Acacia massif de 4 mm d'épaisseur avec traitement effectué en portant le bois à des températures spécifiques, en évitant l'emploi de colorants et de tout agent chimique. Le traitement thermique permet d'obtenir sur l'ensemble de la masse une plus grande stabilité et des teintes de couleur absolument nouvelles et naturelles, influençant les paramètres physiques, améliorant la durabilité, réduisant les risques de gonflement, de contraction de volume et de fuite de résine.

Acacia de 4 mm de espesor de madera maciza con tratamiento llevado a la madera a temperaturas específicas, evitando el uso de tintes y cualquier agente químico. El tratamiento térmico permite obtener en toda la masa una mayor estabilidad y tonos de color absolutamente nuevos y naturales, influyendo en los parámetros físicos, mejorando la durabilidad, ya que reduce las posibilidades de hinchamiento, contracción del volumen y fugas de resina.

Acacia termotrattata (cura e manutenzione) / Heat-treated acacia (care and maintenance) / Wärmebehandelte Akazie (Pflege und Wartung) / Acacia traité thermiquement (entretien et maintenance) / Acacia termotrattada (cuidado y mantenimiento)

Pulire con un panno umido; per una pulizia più approfondita utilizzare prodotti per la pulizia dei vetri che non contengano solventi e asciugare bene con un panno morbido. Non utilizzare prodotti abrasivi o prodotti contenenti cloro, solventi o acetone. Importante : le vernici usate per il legno sono idrofughe, antingiallenti e non vanno rigate o sollecitate con alte temperature. Non utilizzare cere per mobili. Ricordiamo che il legno si comporta anche dopo la lavorazione come prodotto vivo mostrandosi sensibile al calore e all'umidità. Evitare il ristagno di acqua, asciugando le parti in legno dopo ogni uso.

Clean with a damp cloth; for more thorough cleaning, use solvent-free glass-cleaning products and dry well with a soft cloth. Do not use abrasive products or products that contain chlorine, solvents or acetone. Important: the paints used for wood are water-repellent, will not yellow and must not be scratched or subjected to high temperatures. Do not use furniture wax. It must be remembered that, even after treatment, wood is a living material and is therefore sensitive to heat and damp. Dry the parts in wood immediately after each use.

Mit einem feuchten Tuch reinigen; für eine gründlichere Reinigung Produkte für die Glasreinigung verwenden, die keine Lösungsmittel enthalten und mit einem weichen Tuch gut trocknen. Keine schmirgelnden Produkte oder Produkte verwenden, die Chlor, Lösungsmittel oder Aceton enthalten. Wichtig: die für das Holz verwendeten Lacke sind wasserabstoßend, vergilben nicht und dürfen weder verkratzt noch mit hohen Temperaturen belastet werden. Kein Möbelwachs verwenden. Wir erinnern daran, dass sich das Holz auch nach der Bearbeitung als lebendiges Produkt zeigt, das wärme- und feuchtigkeitsempfindlich ist. Importante: las pinturas usadas para la madera son hidrófugas, no amarillean y no hay que rayarlas ni exponerlas a altas temperaturas. No utilice ceras para muebles. Le recordamos que la madera se comporta, incluso después de la elaboración, como un producto vivo, mostrándose sensible a la humedad. Evite el estancamiento del agua secando bien las partes de madera después de cada uso.

Marmo / Marble / Marmor / Marble / Mármol

Il marmo si forma attraverso un processo metamorfico da rocce sedimentarie, quali il calcare o la dolomia, che provoca una completa ricristallizzazione del carbonato di calcio di cui sono in prevalenza composte e dà luogo ad un mosaico di cristalli di calcite o di dolomite (minerale). Il colore del marmo dipende dalla presenza di impurità minerali (argilla, limo, sabbia, ossidi di ferro, noduli di selce), esistenti in granuli o in strati all'interno della roccia sedimentaria originaria. Nel corso del processo metamorfico tali impurità vengono spostate e ricristallizzate a causa della pressione e del calore. I marmi bianchi sono esito della metamorfizzazione di rocce calcaree prive di impurità.

Marble is formed through a metamorphic process from sedimentary rocks, such as limestone or dolomite, which causes a complete recrystallization of calcium carbonate, of which they are predominantly composed and gives rise to a mosaic of calcite or dolomite (mineral) crystals. The color of the marble depends on the presence of mineral impurities (clay, silt, sand, iron oxides, flint nodules), existing in granules or in layers within the original sedimentary rock. During the metamorphic process, these impurities are moved and recrystallized due to pressure and heat. White marbles are the result of the metamorphosis of limestone without impurities.

Marmor wird durch Sedimentgesteine wie Kalkstein oder Dolomit gebildet, die eine vollständige Rekristallisation von Calciumcarbonat bewirken, aus dem sie überwiegend zusammengesetzt sind und einem Mosaik aus Calcit- oder Dolomit (Mineral)-Kristallen zugeordnet werden. Die Farbe des Marmors hängt vom Vorhandensein mineralischer Verunreinigungen (Ton, Schluff, Sand, Eisenoxide, Flintknoten) ab, die in Granulat oder in Schichten innerhalb des ursprünglichen Sedimentgesteins vorhanden sind. Während des metamorphen Prozesses werden diese Verunreinigungen aufgrund von Druck und Hitze bewegt und umkristallisiert. Weiße Marmor sind das Ergebnis der Metamorphose von Kalkstein ohne Verunreinigungen.

Le marbre est formé par un processus de roches sédimentaires, telles que le calcaire ou la dolomite, ce qui provoque une recrystallisation complète du carbonate de calcium, dont il est principalement composé et crée une mosaïque de cristaux de calcite ou de dolomite (minéraux). La couleur du marbre dépend de la présence d'impuretés minérales (argile, limon, sable, oxydes de fer, nodules de silice), présentes sous forme de granules ou de couches dans la roche sédimentaire d'origine. Au cours du processus métamorphique, ces impuretés sont déplacées et recrystallisées en raison de la pression et de la chaleur. Les billes blanches résultent de la métamorphose du calcaire sans impuretés.

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

El mármol se forma a través de un proceso metamórfico a partir de rocas sedimentarias, como la piedra caliza o la dolomita, que provoca una recristalización completa del carbonato de calcio, del cual están compuestas predominantemente y dan lugar a un mosaico de cristales de calcita o dolomita (mineral). El color del mármol depende de la presencia de impurezas minerales (arcilla, limo, arena, óxidos de hierro, nódulos de sílex), existentes en gránulos o en capas dentro de la roca sedimentaria original. Durante el proceso metamórfico, estas impurezas se mueven y recristalizan debido a la presión y el calor. Los mármoles blancos son el resultado de la metamorfosis de la piedra caliza sin impurezas.

Marmo Cura e manutenzione / Marble Care and maintenance / Marmor Pflege und Wartung / Marbre Entretien et maintenance / Mármol Cuidado y mantenimiento

Tutti i nostri lavabi sono trattati con un sigillante protettivo per aumentare la resistenza della superficie contro eventuali agenti aggressivi. Di seguito alcune regole di cura e manutenzione da seguire per preservare la bellezza del vostro manufatto in marmo:

1. Pulire il lavabo almeno una volta alla settimana usando una spugna o un panno morbido e un detergente neutro adatto alle superfici in pietra.
2. Rimuovere ristagni d'acqua che si possono formare sulla superficie del lavabo: quando l'acqua staziona troppo a lungo si possono creare dei depositi calcarei.
3. Rimuovere il prima possibile qualsiasi eventuale sostanza aggressiva che sia stata accidentalmente versata sulla superficie ed in ogni caso prima che abbia la possibilità di venire assorbito dalla pietra. Il sigillante protettivo che applichiamo su ogni nostra superficie crea una barriera temporanea per limitare l'assorbimento dei liquidi, ma una azione di rimozione degli agenti macchianti pronta ed efficace è sempre il miglior rimedio. Alcuni dei prodotti che potrebbero macchiare la superficie sono caffè, tè, vino rosso, solventi per unghie, lozioni autoabbronzanti e tinture per capelli.
4. Evitare assolutamente prodotti contenenti acidi, candeggina, alcol, prodotti particolarmente aggressivi inclusi tutti quelli specifici per la rimozione del calcare ed i prodotti abrasivi.
5. Una delle principali caratteristiche della pietra naturale è la sua resistenza all'usura, quindi è possibile utilizzare delle spazzole morbide senza temere di provocare danni. Da evitare però l'uso di spugne abrasive o pagliette d'acciaio. Nel caso di macchie particolarmente ostinate, consigliamo l'uso del prodotto FILA PS87.

All our washbasins are treated with a protective sealant to increase the resistance of the surface against any aggressive agents. Here are some rules of care and maintenance to follow to preserve the beauty of your marble product:

1. Clean the sink at least once a week using a sponge or soft cloth and a neutral detergent suitable for stone surfaces.
2. Remove stagnant water that may form on the surface of the sink: when the water is standing too long it can create limescale deposits.
3. Remove as soon as possible any aggressive substance that has been accidentally poured on the surface and in any case before it has the possibility of being absorbed by the stone. The protective sealant that we apply on each of our surfaces creates a temporary barrier to limit the absorption of liquids, but a prompt and effective removal action of staining agents is always the best remedy. Some of the products that could stain the surface are coffee, tea, red wine, nail polish remover, self-tanning lotions and hair dye.
4. Absolutely avoid products containing acids, bleach, alcohol, particularly aggressive products including all those specific for the removal of limestone and abrasive products.
5. One of the main characteristics of natural stone is its resistance to wear, so it is possible to use soft brushes without fear of causing damage. However, the use of abrasive sponges or steel scourers has to be avoided. In case of particularly stubborn stains, we recommend the use of the product FILA PS87.

Alle unsere Waschbecken sind mit einem Schutzmittel versiegelt. Hier sind einige Regeln zur Pflege und Wartung, um der Schönheit Ihres Marmorprodukts zu folgen:

1. Reinigen Sie die Spüle mindestens einmal pro Woche mit einem Schwamm oder einem weichen Tuch und einem neutralen Reinigungsmittel, das für Steinoberflächen geeignet ist.
2. Entfernen Sie eventuell stehendes Wasser von der Oberfläche der Spüle.
3. Entfernen Sie so schnell wie möglich alle aggressiven Substanzen, die vom Stein aufgenommen wurden. Das schützende Versiegelungsmittel, das auf die Auswirkungen der Verwendung der Liquidität aufgetragen wird, jedoch auf die sofortige Abhilfe. Einige der Produkte, die die Oberfläche verschmutzen könnten, sind Kaffee, Tee, Rotwein, Nagellackentferner, Selbstbräuner, Lotionen und Haarfärbemittel.
4. Vermeiden Sie unbedingt Produkte, die Säuren, Bleichmittel, Alkohol und besonders aggressive Produkte enthalten, einschließlich aller Produkte zur Entfernung von Kalkstein und Schleifmitteln.
5. Eines der Hauptmerkmale von Naturstein ist die Verschleißfestigkeit. Um jedoch die Verwendung von Schleifschwämmen oder Stahlwaschmitteln zu vermeiden. Bei besonders hartnäckigen Flecken empfehlen wir die Verwendung des Produkts FILA PS87.

Tous nos lavabos sont traités avec un scellant protecteur. Voici quelques règles d'entretien à suivre pour préserver la beauté de votre produit en marbre :

1. Nettoyez le lavabo au moins une fois par semaine avec une éponge ou un chiffon doux et un détergent neutre pour les surfaces en pierre.
2. Éliminez l'eau stagnante pouvant se former sur la surface du lavabo. Si l'eau reste trop longtemps sur une surface, elle peut créer de dépôts de calcaire.
3. Enlevez dès que possible toute substance agressive versée accidentellement sur la surface et, en tout cas, avant qu'elle puisse être absorbée par la pierre. Le mastic protecteur qui est appliqué sur nos surfaces crée une barrière temporaire pour limiter l'absorption des liquides, mais une action rapide et efficace pour éliminer les agents de coloration est toujours le meilleur remède. Certains des produits susceptibles de tacher la surface sont le café, le thé, le vin rouge, le dissolvant de vernis à ongles, les lotions autobronzantes et les teintures de cheveux.
4. Évitez absolument les produits contenant des acides, de l'eau de javel, de l'alcool, des produits particulièrement agressifs, y compris tous ceux destinés à l'élimination des produits calcaires et abrasifs.
5. L'une des principales caractéristiques de la pierre naturelle est sa résistance à l'usure. Il est donc possible d'utiliser de brosses douces sans crainte de dommages. Cependant, évitez d'utiliser des éponges abrasives ou des tampons à recurer en acier. Dans le cas de taches particulièrement rebelles, nous recommandons l'utilisation du produit FILA PS87.

Todos nuestros lavabos están tratados con un sellador protector para aumentar la resistencia de la superficie contra cualquier agente agresivo. Aquí hay algunas reglas de cuidado y mantenimiento a seguir para preservar la belleza de su producto de mármol:

1. Limpie el fregadero al menos una vez a la semana con una esponja o paño suave y un detergente neutro adecuado para superficies de piedra.
2. Elimine el agua estancada que pueda formarse en la superficie del fregadero: cuando el agua permanece en reposo durante mucho tiempo, puede crear depósitos de cal.
3. Retire lo antes posible cualquier sustancia agresiva que se haya vertido accidentalmente en la superficie y, en cualquier caso, antes de que tenga la posibilidad de ser absorbida por la piedra. El sellador protector que aplicamos en cada una de nuestras superficies crea una barrera temporal para limitar la absorción de líquidos, pero una acción de remoción rápida y efectiva de los agentes de tinción es siempre el mejor remedio. Algunos de los productos que podrían manchar la superficie son café, té, vino tinto, removedor de esmalte de uñas, lociones bronceadoras y tintes para el cabello.
4. Evite absolutamente los productos que contienen ácidos, lejía, alcohol, productos particularmente agresivos, incluidos todos aquellos específicos para la eliminación de piedra caliza y productos abrasivos.
5. Una de las características principales de la piedra natural es su resistencia al desgaste, por lo que es posible utilizar cepillos suaves sin temor a causar daños. Para evitar, sin embargo, el uso de esponjas abrasivas o estropajos de acero. En el caso de manchas especialmente persistentes, recomendamos el uso del producto FILA PS87.

Fenix / Fenix / Fenix / Fenix / Fenix

FENIX è un materiale ad alto contenuto tecnologico, unico nelle sue caratteristiche grazie a una particolare serie di lavorazioni che prevede un coating multistrato, l'uso di nanoparticelle e resine acriliche di nuova generazione, indurite e fissate attraverso il processo di Electron Beam Curing, un innovativo metodo di polimerizzazione a freddo. La lavorazione rende il materiale anti-impronta, morbido al tatto, opaco ed estremamente resistente, tanto che può sopportare urti, graffi, ma anche l'attacco di solventi e reagenti tipicamente usati nelle pulizie domestiche. FENIX resiste anche al calore. Anzi il calore, qualora si presentino micro graffi superficiali, aiuta a ripararli. La superficie del materiale è costellata da un fitto reticolo di polimeri incrociati, con una propria memoria che viene riattivata grazie al calore. FENIX è anche idrorepellente, igienico e resistente alle muffe, perfettamente adatto al contatto con gli alimenti e facile da pulire.

FENIX is a material with a high technological content, unique in its features thanks to a particular series of processes that involves a multilayer coating, the use of nanoparticles and new generation acrylic resins, hardened and fixed through the process of Electron Beam Curing, an innovative cold curing method. The workmanship makes the material anti-fingerprint, soft to the touch, opaque and extremely resistant, so that it can withstand shocks, scratches, but also the attack of solvents and reagents typically used in domestic cleaning. FENIX also resists heat. Indeed the heat, if there are micro scratches superficial, helps to repair them. The surface of the material is studded with a dense network of crossed polymers, with its own memory that is reactivated thanks to the heat. FENIX is also water repellent, hygienic and resistant to mold, perfectly suited to contact with food and easy to clean.

FENIX ist ein Material mit einem hohen technologischen Gehalt, das aufgrund einer besonderen Reihe von Prozessen, bei denen eine Mehrschichtbeschichtung, die Verwendung von Nanopartikeln und Acrylharzen der neuen Generation, die durch den Prozess der Elektronenstrahlhärtung gehärtet und fixiert werden, einzigartig ist innovative Kaltvulkanisationsmethode. Die Verarbeitung macht das Material gegen Fingerabdrücke, weich im Griff, undurchlässig und extrem widerstandsfähig, so dass es Stößen, Kratzern, aber auch dem Angriff von Lösungsmitteln und Reagenzien widerstehen kann, die normalerweise bei der Haushaltsreinigung verwendet werden. FENIX widersteht auch Hitze. In der Tat hilft die Hitze, wenn Mikrokratzer oberflächlich sind, sie zu reparieren. Die Oberfläche des Materials ist mit einem dichten Netzwerk aus gekreuzten Polymeren besetzt, mit einem eigenen Speicher, der dank der Wärme reaktiviert wird. FENIX ist außerdem wasserabweisend, hygienisch und schimmelresistent, perfekt für den Kontakt mit Lebensmitteln geeignet und leicht zu reinigen.

FENIX est un matériau à fort contenu technologique, unique dans ses caractéristiques grâce à une série de procédés impliquant un revêtement multicouche, l'utilisation de nanoparticules et de résines acryliques de nouvelle génération, durcis et fixés selon le procédé de photopolymérisation méthode innovante de traitement à froid. La fabrication rend le matériau anti-empreintes digitales, doux au toucher, opaque et extrêmement résistant, de sorte qu'il puisse résister aux chocs, aux rayures, mais également à l'attaque des solvants et des réactifs généralement utilisés dans le nettoyage domestique. FENIX résiste également à la chaleur. En effet la chaleur, s'il y a des micro-rayures superficielles, aide à les réparer. La surface du matériau est constituée d'un réseau dense de polymères croisés, avec sa propre mémoire réactivée grâce à la chaleur. FENIX est également hydrofuge, hygiénique et résistant aux moisissures, parfaitement adapté au contact avec les aliments et facile à nettoyer.

FENIX es un material con un alto contenido tecnológico, único en sus características gracias a una serie particular de procesos que involucra un recubrimiento multicapa, el uso de nanopartículas y resinas acrílicas de nueva generación, endurecidas y fijadas a través del proceso de curado con haz de electrones, un Método innovador de curado en frío. La fabricación hace que el material sea antihuellas, suave al tacto, opaco y extremadamente resistente, de modo que pueda resistir golpes, rasguños, pero también el ataque de solventes y reactivos que se utilizan normalmente en la limpieza doméstica. FENIX también resiste el calor. De hecho el calor, si hay micro rasguños superficiales, ayuda a repararlos. La superficie del material está tachonada con una densa red de polímeros cruzados, con su propia memoria que se reactiva gracias al calor. FENIX también repele el agua, es higiénico y resistente al moho, se adapta perfectamente al contacto con los alimentos y es fácil de limpiar.

Cura e manutenzione Fenix / Fenix Care and maintenance / Fenix Pflege und Wartung / Entretien et maintenance de Fenix / Cuidado y mantenimiento Fenix

Pulire con un panno umido con acqua tiepida e detergente delicato. Per macchie ostinate usare panno umido non abrasivo e detersivi per la casa non abrasivi o con solventi, avendo cura di sciacquare con acqua calda. Micro graffi possono essere rimossi seguendo le istruzioni specifiche reperibili sul sito www.fenixforinteriors.com.

Wipe with a damp cloth with warm water and a mild detergent. For stubborn stains, use a non-abrasive wet cloth and non-abrasive household cleaners or solvents, taking care to rinse with warm water. Micro scratches can be removed by following the specific instructions available at www.fenixforinteriors.com.

Mit einem feuchten Tuch mit warmem Wasser und einem milden Reinigungsmittel abwischen. Bei hartnäckigen Flecken verwenden Sie ein nicht scheuerndes, feuchtes Tuch und nicht scheuernde Haushaltsreiniger oder Lösungsmittel. Achten Sie darauf, mit warmem Wasser zu spülen. Mikrokratzer können durch Befolgen der spezifischen Anweisungen unter www.fenixforinteriors.com entfernt werden.

Nettoyez avec un chiffon humide avec de l'eau tiède et un détergent doux. Pour les taches tenaces, utilisez un chiffon humide non abrasif et de nettoyeurs ménagers non abrasifs ou de solvants, en prenant soin de bien les rincer à l'eau tiède. Les micro-rayures peuvent être éliminées en suivant les instructions spécifiques disponibles sur www.fenixforinteriors.com

Limpie con un paño húmedo con agua tibia y un detergente suave. Para manchas difíciles, use un paño húmedo no abrasivo y limpiadores o solventes domésticos no abrasivos, teniendo cuidado de enjuagar con agua tibia. Los micro arañazos se pueden eliminar siguiendo las instrucciones específicas disponibles en www.fenixforinteriors.com.

Cura e manutenzione dei legni speciali e dei legni masselli e solid skin / Care and maintenance on special woods and solid and Solid Skin woods / Pflege und Instandhaltung von Spezialholz, Massivholz und Solid Skin / Soins et entretien des bois spéciaux et des bois massifs et Solid Skin / Cuidado y mantenimiento de las maderas especiales y de las maderas macizas y Solid Skin (piel dura)

Legni / Woods / Hölzer / Bois / Maderas

Le finiture legno, ottenute su impiallacciate rovere, possono presentare differenze di colore, sfumature e/o piccole imperfezioni. Fattori ambientali diversi, l'effetto della luce e l'invecchiamento possono determinare nel tempo variazioni di tonalità e colore. In caso di completamenti o sostituzioni parziali si potranno, quindi, avere differenze di accostamento. Le suddette caratteristiche di pregio e naturalità del materiale non possono, quindi, diventare motivo di reclamo o contestazione di alcun genere.

The oak veneer finishes may vary in colour, shade and/or have small imperfections. Various environmental factors, the effects of light and ageing may cause shades and colours to change over time and therefore units that are completed or partially substituted may not match. The above natural characteristics of the material cannot therefore be considered to be a valid reason for complaints or claims of any kind.

Die Holzfinishs auf den Eichenfurnieren können Farbdifferenzen, Farbnuancen und/oder kleine Fehler aufweisen. Diverse Umweltfaktoren, die Wirkung des Lichts und der Alterung können mit der Zeit Veränderungen des Farbtons und der Farbe bewirken. Im Falle von Ergänzungen oder Teilersatz kann es daher zu Unterschieden in der Kombination kommen. Die besagten Charakteristika des Werts und der Natürlichkeit des Materials können keinen Anlass für irgendeine Beschwerde bilden.

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLERGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

Les finitions bois, obtenues sur les plaqués chêne rouvre, peuvent présenter des différences de couleur, des nuances et/ou de petites imperfections. Des conditions ambiantes différentes, l'effet de la lumière et le vieillissement peuvent déterminer, avec le temps, des variations de tonalité et de couleur. En cas de compléments ou de remplacements partiels, on pourra donc avoir des différences de composition. Ces caractéristiques de qualité et d'authenticité ne peuvent donc pas donner lieu à des réclamations ou des contestations de quelque nature que ce soit.

Las terminaciones de madera, obtenidas en contrachapados de roble, pueden presentar diferencias de color, matices y/o pequeñas imperfecciones. Factores ambientales distintos, el efecto de la luz y el envejecimiento pueden determinar a través del tiempo variaciones de tonalidad y color. En caso de completación o sustitución parcial podrá haber, por tanto, diferencias de combinación. Dichas características de calidad y naturaleza del material no pueden ser, por consiguiente, motivo de reclamación de ningún tipo.

Legni e legni speciali / Woods and special woods / Hölzer und Spezialhölzer / Bois et bois speciaux / Maderas y maderas especiales

Pulire con un panno umido; per una pulizia più approfondita utilizzare prodotti per la pulizia dei vetri che non contengano solventi e asciugare bene con un panno morbido. Non utilizzare prodotti abrasivi o prodotti contenenti cloro, solventi o acetone. Importante: le vernici usate per il legno sono idrofughe, antingiallenti e non vanno rigate o sollecitate con alte temperature. Non utilizzare cere per mobili. Ricordiamo che il legno si comporta anche dopo la lavorazione come prodotto vivo mostrandosi sensibile al calore e all'umidità. Evitare il ristagno di acqua, asciugando le parti in legno dopo ogni uso.

Clean with a damp cloth; for more thorough cleaning, use solvent-free glass-cleaning products and dry well with a soft cloth. Do not use abrasive products or products that contain chlorine, solvents or acetone. Important: the paints used for wood are water-repellent, will not yellow and must not be scratched or subjected to high temperatures. Do not use furniture wax. It must be remembered that, even after treatment, wood is a living material and is therefore sensitive to heat and damp. Dry the parts in wood immediately after each use.
Mit einem feuchten Tuch reinigen; für eine gründlichere Reinigung Produkte für die Glasreinigung verwenden, die keine Lösungsmittel enthalten und mit einem weichen Tuch gut trocknen. Keine schmirgelnden Produkte oder Produkte verwenden, die Chlor, Lösungsmittel oder Aceton enthalten. Wichtig: die für das Holz verwendeten Lacke sind wasserabstoßend, vergilben nicht und dürfen weder verkratzt noch mit hohen Temperaturen belastet werden. Kein Möbelwachs verwenden. Wir erinnern daran, dass sich das Holz auch nach der Bearbeitung als lebendiges Produkt zeigt, das wärme- und feuchtigkeitsempfindlich ist. Vermeiden, dass sich Wasser staut, die Holzteile nach jedem Gebrauch trocknen.

Nettoyer avec un chiffon humide; pour un nettoyage plus approfondi, utiliser un nettoyeur pour vitres exempt de solvants et bien essuyer avec un chiffon doux. Important: les peintures pour bois sont hydrofuges, ne jaunissent pas et ne doivent pas être rayées ou exposées à des températures élevées. Ne pas utiliser d'encastiques pour meubles. Nous rappelons que le bois reste un produit vivant, sensible à la chaleur et à l'humidité, même après son usinage. Éviter les dépôts d'eau, et sécher les parties en bois après chaque utilisation.

Limpie con un trapo húmedo; para una limpieza profunda utilice productos para la limpieza de cristales que no contengan solventes y seque bien con un trapo suave. No utilice productos abrasivos o que contengan cloro, solventes o acetona. Importante: las pinturas usadas para la madera son hidrófugas, no amarillean y no hay que rayarlas ni exponerlas a altas temperaturas. No utilice ceras para muebles. Le recordamos que la madera se comporta, incluso después de la elaboración, como un producto vivo, mostrándose sensible a la humedad. Evite el estancamiento del agua secando bien las partes de madera después de cada uso.

Cristalplant Biobased

Si tratta del primo solid surface eco-sostenibile, derivante da materie prime resinose di origine vegetale, miscelate a minerali inerti naturali di estrema purezza. Il Cristalplant biobased può essere riciclato e riutilizzato a fine vita come inerte; è più leggero del 30%, produce quindi meno CO2 rispetto a prodotti analoghi attualmente in commercio, oltre a facilitarne la movimentazione e l'installazione; è ripristinabile al 100% anche con superficie graffiata, macchiata o bruciata; è autoestinguente, con certificazione di resistenza al fuoco Classe 1; è prodotto al 100% in Italia. Cristalplant® biobased è inoltre un materiale idoneo a ottenere punteggio "VOC" e "BIO-BAS ED" per certificazioni di eco-sostenibilità LEED "Leadership in Energy and Environmental Design". Il materiale ha ottenuto nel 2011 la certificazione che le resine derivano da amidi vegetali e mais OGM-free. Il Cristalplant è stampato a iniezione e consente quindi ai manufatti di essere realizzati nella loro interezza senza necessità di incollaggi garantendo una perfetta resistenza ed uniforme elasticità a fronte di sollecitazioni e sbalzi termici.

The is the first eco-sustainable solid surface, derived from plant origin resin materials, mixed with extremely pure natural aggregate materials. Cristalplant biobased can be recycled and reused at the end of its life as aggregate; it is 30% lighter and therefore produces less CO2 than similar products currently available on the market, as well as facilitating handling and installation; it can be restored to 100% even with scratched, stained or burned surfaces; it is self-extinguishing with Class 1 fire resistance certification; it is 100% made in Italy. Cristalplant® biobased is also a suitable material for obtaining "VOC" and "BIO-BAS ED" points for LEED "Leadership in Energy and Environmental Design" eco-sustainability certification. The material earned certification in 2011 that the resins are derived from OGM-free plant and corn starches. Cristalplant is injection moulded and therefore allows products to be made entirely without the need for gluing, guaranteeing perfect resistance and uniform elasticity against wear and thermal stress.

Es handelt sich um die erste ökologisch nachhaltige Solid Surface, die aus harzhaltigen Rohstoffen vermischt mit extrem reinen natürlichen mineralischen Zuschlagstoffen gewonnen wird. Cristalplant biobased kann am Ende seines Lebenszyklus recycelt und als Zuschlagstoff wiederverwendet werden; es ist 30 % leichter als analoge, derzeit im Handel erhältliche Produkte, produziert somit weniger CO2 und lässt sich leichter transportieren und installieren; es lässt sich zu 100 % wiederherstellen, auch bei Oberflächen mit Kratzern, Flecken und Brandflecken; es ist selbstlöschend und entspricht der Brandschutzklasse 1; es wird zu 100 % in Italien produziert. Cristalplant® biobased ist außerdem ein geeignetes Material für eine höhere „VOC“- und „BIO-BASED“-Bewertung für Zertifizierungen der Nachhaltigkeit durch „Leadership in Energy and Environmental Design“. Das Material hat 2011 die Zertifizierung erhalten, dass die Harze aus pflanzlicher Stärke und GVO-freiem Mais gewonnen wird. Cristalplant wird spritzgegossen, wodurch die Produkte im Ganzen hergestellt werden können und nicht geleimt werden müssen. Das Ergebnis ist eine perfekte Widerstandsfähigkeit und gleichmäßige Elastizität bei starker Beanspruchung und Temperaturschwankungen.

Il s'agit du premier "solid surface" écordable, dérivant de matières premières résineuses d'origine végétale mélangées à des matières minérales inertes naturelles extrêmement pures. Cristalplant biobased peut être recyclé et réutilisé en fin de vie comme inerte; il est plus léger de 30%, produit ainsi moins de CO2 par rapport aux produits analogues actuellement dans le commerce en plus de faciliter la manutention et l'installation; il peut être restauré à 100% même en cas de surface rayée, tachée ou brûlée; il est auto-extinguible avec certification de résistance au feu Classe 1; il est 100% "Made in Italy". Cristalplant® biobased est également un matériel permettant d'obtenir un score "VOC" et "BIO-BASED" pour certifications de biomatériaux viables LEED "Leadership in Energy and Environmental Design". Le matériel a obtenu en 2011 la certification que les résines proviennent d'amidons végétaux et de maïs sans OGM. Cristalplant est moulé par injection et permet donc aux produits d'être réalisés dans leur intégralité sans nécessiter de collages en garantissant une résistance parfaite et une élasticité uniforme en mesure de faire face aux sollicitations et aux écarts thermiques.

Se trata de la primer superficie sólida eco-sostenible que deriva de materias primas resinosas de origen vegetal, mezcladas con minerales inertes naturales de extremada pureza. Cristalplant biobased puede ser reciclado y reutilizado hasta el final como inerte; presenta una ligereza del 30%, por lo que produce menos CO2 con respecto a productos con las mismas características actualmente en el mercado, además de facilitar la movilización y la instalación; puede restablecerse al 100% incluso con la superficie rayada, manchada o quemada; es auto extingüible, con certificación de resistencia al fuego Clase 1; está producido al 100% en Italia. Cristalplant® biobased es además un material indicado para obtener una puntuación "VOC" y "BIO-BAS ED" para certificaciones de eco-sostenibilidad LEED "Leadership in Energy and Environmental Design". El material a obtenido en el 2011 la certificación que las resinas derivan de almidos vegetales y del maíz sin OGM. Cristalplant es impreso a inyección y permite a las manufacturas ser realizadas por completo sin necesidad de realizar encolados garantizando una perfecta resistencia y una uniforme elasticidad frente a oscilaciones y saltos térmicos.

Cura e manutenzione Cristalplant Biobased / Cristalplant Biobased care and maintenance

Pflege und Instandhaltung von Cristalplant Biobased / Soins et entretien Cristalplant Biobased / Cuidado y mantenimiento de Cristalplant Biobased

Pulire CRISTALPLANT® BIOBASED con acqua saponata o comuni detersivi per rimuovere la maggior parte delle macchie e dello sporco che si possono depositare sulla superficie. Si sconsiglia l'utilizzo di prodotti chimici aggressivi quali acetone, trielina, acidi o basi forti. CRISTALPLANT® BIOBASED è un materiale omogeneo in tutto il suo spessore può quindi essere riparato dalle aggressioni superficiali, quali graffi, bruciature di sigaretta e macchie ostinate, adoperando una spugnetta abrasiva Scotch Brite® (marchio registrato 3M) e un comune pulitore abrasivo. Levigare superficialmente la parte danneggiata. Se il difetto è ancora visibile ripassare levigando con carta abrasiva molto fine.

Clean CRISTALPLANT® BIOBASED with soapy water or common detergents to remove most stains and dirt that may deposit on the surface. We do not recommend using aggressive chemical products such as acetone, trichloroethylene, acids or strong bases CRISTALPLANT® BIOBASED is an even material throughout its thickness and can therefore be protected from surface aggressions such as scratches, cigarette burns and stubborn stains by using an abrasive Scotch Brite® (3M trademark) sponge and a common abrasive cleaner. Surface sand the damaged part. If the defect is still visible, sand again with very fine paper.

Reinigen Sie CRISTALPLANT® BIOBASED mit Seifenwasser oder handelsüblichen Reinigungsmitteln, um die meisten Flecken und Schmutzablagerungen auf der Oberfläche zu entfernen. Verwenden Sie für die Reinigung möglichst keine aggressiven Chemikalien wie Aceton, Trichlorethylen, starke Säuren oder Basen. CRISTALPLANT® BIOBASED ist ein Material mit völlig gleichmäßiger Oberfläche und kann daher einfach mit einem Scheuerschwamm Scotch Brite® (registrierte Marke von 3M) und einem handelsüblichen Scheuermittel von oberflächlichen Schäden wie Kratzern, Brandflecken von Zigaretten und hartnäckigen Flecken befreit werden. Schleifen Sie die beschädigte Stelle oberflächlich ab. Wenn der Defekt anschließend noch sichtbar ist, glätten Sie sie mit sehr feinem Sandpapier.

Nettoyer CRISTALPLANT® BIOBASED avec de l'eau et du savon ou détergents habituels pour retirer la majeure partie des taches et la saleté qui peuvent se déposer sur la surface. On déconseille d'utiliser des produits chimiques agressifs tels que l'acétone, le trichloréthylène, les acides ou les bases fortes. CRISTALPLANT® BIOBASED est un matériel homogène sur toute son épaisseur, il peut donc être réparé en cas de surface agressée par des rayures, des brûlures de cigarettes et des taches tenaces en utilisant une éponge abrasive Scotch Brite® (marque enregistrée 3M) et un nettoyant abrasif que l'on trouve communément dans le commerce. Polir la surface de la partie abîmée. Si le défaut est encore visible repasser en polissant avec un papier abrasif très fin.

Limpie CRISTALPLANT® BIOBASED con agua enjabonada o detergentes comunes para eliminar la mayor parte de las manchas y de la suciedad que puede depositarse en la superficie. Se recomienda utilizar productos químicos agresivos como acetona, bencina quitamanchas, ácidos o bases fuertes. CRISTALPLANT® BIOBASED es un material homogéneo en todo su espesor por lo que puede ser reparado de las agresiones superficiales, como rayones, quemaduras de cigarrillos y manchas resistentes, utilizando una esponja abrasiva Scotch Brite® (marca registrada 3M) y un limpiador abrasivo común. Frotar superficialmente la parte dañada. Si el defecto aún es visible repase frotando con papel abrasivo muy fino.

Ceramilux SSL opaco e lucido / Matt and glossy Ceramilux SSL

Ceramilux SSL matt oder glänzend / Ceramilux SSL mat et brillant / Ceramilux SSL opaco y brillante

Innovativo materiale solido in poliesteri acrilato contenente speciali minerali particolarmente resistenti che conferiscono eccellenti caratteristiche di resistenza meccanica, superficiale e alta lucentezza. Ceramilux SSL è un materiale eco sostenibile perché realizzato da minerali provenienti da fonti naturali e resine poliesteri modificate di origine vegetale. Resina, filler e additivi riescono ad interagire ottenendo risultati fino ad ora difficilmente raggiungibili nella realizzazione di prodotti con spessori ridotti e nella elevata resistenza a graffi e scalfitture, che sono superiori a quelli dei classici materiali utilizzati in questo settore. Ceramilux SSL è comunque ripristinabile al 100% anche con superficie graffiata, macchiata o bruciata e può essere riciclato e riutilizzato a fine vita come inerte. Il Ceramilux è stampato a iniezione e consente quindi ai manufatti di essere realizzati nella loro interezza senza necessità di incollaggi garantendo una perfetta resistenza ed uniforme elasticità a fronte di sollecitazioni e sbalzi termici.

Innovative solid material in acrylate polyester containing special minerals which are particularly resistant that convey excellent mechanical and surface resistance characteristics and high gloss. Ceramilux SSL is an eco-sustainable material because it is made from minerals that come from natural sources and modified polyester resins of plant origin. Resin, filler and additives manage to interact, obtaining results which until now were difficult to achieve in making such thin and highly scratch resistant products, superior to those made from the conventional materials used in this sector. Ceramilux SSL can therefore be restored to 100% even with a scratched, stained or burned surface and it can be recycled and reused at the end of its life as aggregate. Ceramilux is injection moulded and therefore allows products to be made entirely without the need for gluing, guaranteeing perfect resistance and uniform elasticity against wear and thermal stress.

Innovatives festes Material aus Acrylpolyester, das spezielle Minerale enthält, die besonders widerstandsfähig sind und ihm hervorragende Eigenschaften in Bezug auf mechanische und oberflächliche Widerstandsfähigkeit sowie einen hohen Glanz verleihen. Ceramilux SSL ist ein ökologisch nachhaltiges Material, weil es aus Mineralien aus natürlichen Quellen und modifizierten Polyesterharzen pflanzlichen Ursprungs gewonnen wird. Durch die Interaktion von Harz, Füllstoffen und Zusatzstoffen werden Ergebnisse erzielt, die sich bei der Realisierung von Produkten mit geringer Stärke nur schwer erreichen lassen. Zugleich liegt die Widerstandsfähigkeit gegenüber Kratzern und Schrammen über denen der klassischen Materialien, die in diesem Bereich verwendet werden. Ceramilux SSL lässt sich zudem zu 100 % wiederherstellen, auch bei Oberflächen mit Kratzern, Flecken und Brandflecken, und kann am Ende seines Lebenszyklus recycelt und als Zuschlagstoff wiederverwendet werden. Ceramilux wird spritzgegossen, wodurch die Produkte im Ganzen hergestellt werden können und nicht geleimt werden müssen. Das Ergebnis ist eine perfekte Widerstandsfähigkeit und gleichmäßige Elastizität bei starker Beanspruchung und Temperaturschwankungen.

Matériel innovateur solide en acrylate de polyester contenant des minéraux spéciaux particulièrement résistants qui confèrent d'excellentes caractéristiques de résistance mécanique, superficielle et un fort pouvoir satiné. Ceramilux SSL est un matériel écodurable puisqu'il est réalisé à partir de minéraux provenant de sources naturelles et de résines en polyester modifiées d'origine végétale. Résine, mastic et additifs réussissent à interagir ce qui permet d'arriver à des résultats jusqu'à maintenant difficiles à obtenir dans la réalisation de produits avec des épaisseurs réduites et avec un degré de résistance élevé aux rayures et rainures supérieur à celui des matériaux classiques utilisés dans le secteur. Ceramilux SSL peut toutefois être restauré à 100% même en cas de surface rayée, tachée ou brûlée et il peut être recyclé et réutilisé en fin de vie comme inerte. Ceramilux est moulé par injection et permet donc aux produits d'être réalisés dans leur intégralité sans nécessiter de collages en garantissant une résistance parfaite et une élasticité uniforme en mesure de faire face aux sollicitations et aux écarts thermiques.

Material innovador sólido de poliéster acrilato que contiene minerales especiales particularmente resistentes que aportan excelentes características de resistencia mecánica, superficial y de elevado esplendor. Ceramilux SSL es un material eco-sostenible ya que está realizado con materiales que provienen de fuentes naturales y resinas de poliéster modificadas de origen vegetal. Resina, relleno y aditivos logran interactuar obteniendo resultados hasta ahora difíciles de alcanzar en la realización de productos con un espesor reducido y una alta resistencia a los rasguños y rayas, que son superiores a aquellos clásicos materiales utilizados en este sector. Ceramilux SSL puede restablecerse al 100% incluso con la superficie rayada, manchada o quemada y además puede ser reciclado y reutilizado hasta el final como inerte. Ceramilux es impreso a inyección y permite a las manufacturas ser realizadas por completo sin necesidad de realizar encolados garantizando una perfecta resistencia y una uniforme elasticidad frente a oscilaciones y saltos térmicos.

Ceramilux lucido / Glossy Ceramilux / Ceramilux glänzend / Ceramilux brillant / Ceramilux brillante

Materiale composto da cariche minerali naturali (carbonati di calcio e triidrati di alluminio) e resina poliesteri. Il film di smalto tecnico lucido che riveste la superficie del materiale è di tipo poliesteri acrilato che consente di ottenere caratteristiche di resistenza. L'estetica e le caratteristiche meccaniche e chimiche rendono questo materiale adatto all'arredo di bagno e degli ambienti pubblici. Ceramilux è ripristinabile al 100% anche con superficie graffiata, macchiata o bruciata e può essere riciclato e riutilizzato a fine vita come inerte. Il Ceramilux è stampato a iniezione e consente quindi ai manufatti di essere realizzati nella loro interezza senza necessità di incollaggi garantendo una perfetta resistenza ed uniforme elasticità a fronte di sollecitazioni e sbalzi termici.

Material composed of natural mineral loads (calcium carbonate and aluminium trihydrate) and polyester resin. The glossy technical enamel film that coats the surface of the material is acrylate polyester type that allows the resistance characteristics to be obtained. The aesthetics and mechanical and chemical characteristics make this material suitable for bathroom and public area furnishings. Ceramilux can be restored to 100% even with a scratched, stained or burned surface and it can be recycled and reused at the end of its life as aggregate. Ceramilux is injection moulded and therefore allows products to be made entirely without the need for gluing, guaranteeing perfect resistance and uniform elasticity against wear and thermal stress.

Materiale bestehend aus natürlichen mineralischen Füllstoffen (Kalziumcarbonat und Aluminiumtrihydrat) und Polyesterharz. Die Oberfläche des Materials ist mit einer glänzenden technischen Glasur aus Acrylpolyester überzogen, die ihm Widerstandsfähigkeit verleiht. Dank seiner optischen, mechanischen und chemischen Eigenschaften ist dieses Material für die Einrichtung von Bädern und öffentlichen Räumen geeignet. Ceramilux lässt sich zu 100 % wiederherstellen, auch bei Oberflächen mit Kratzern, Flecken und Brandflecken, und kann am Ende seines Lebenszyklus recycelt und als Zuschlagstoff wiederverwendet werden. Ceramilux wird spritzgegossen, wodurch die Produkte im Ganzen hergestellt werden können und nicht geleimt werden müssen. Das Ergebnis ist eine perfekte Widerstandsfähigkeit und gleichmäßige Elastizität bei starker Beanspruchung und Temperaturschwankungen.

Matériel composé de charges minérales naturelles (carbonate de calcium et de trihydrate d'alumine) et de résine en polyester. Le film d'émail technique brillant qui revêt la surface du matériel est en acrylate de polyester ce qui le rend résistant. L'esthétique et les caractéristiques mécaniques et chimiques permettent à ce matériel d'être adapté au mobilier de salle de bain et aux lieux publics. Ceramilux peut être restauré à 100% même en cas de surface rayée, tachée ou brûlée et il peut être recyclé et réutilisé en fin de vie comme inerte. Ceramilux est moulé par injection et permet donc aux produits d'être réalisés dans leur intégralité sans nécessiter de collages en garantissant une résistance parfaite et une élasticité uniforme en mesure de faire face aux sollicitations et aux écarts thermiques.

Materiale compuesto por cargas minerales naturales (carbonatos de calcio y trihidratos de aluminio) y resina poliéster. La película de esmalte técnico brillante que reviste la superficie del material es de tipo poliéster acrilato que permite obtener características de resistencia. La estética y las características mecánicas y químicas convierten a este material en indicado para la decoración del baño y de los ambientes públicos. Ceramilux puede restablecerse al 100% incluso con la superficie rayada, manchado o quemada y además puede ser reciclado y reutilizado hasta el final como inerte. Ceramilux es impreso a inyección y permite a las manufacturas ser realizadas por completo sin necesidad de realizar encolados garantizando una perfecta resistencia y una uniforme elasticidad frente a oscilaciones y saltos térmicos.

Cura e manutenzione Ceramilux lucido / Glossy Ceramilux care and maintenance

Pflege und Instandhaltung von Ceramilux glänzend / Soins et entretien Ceramilux brillant / Cuidado y mantenimiento de Ceramilux brillante

Il calcare e lo sporco che si depositano sulla superficie del Ceramilux lucido possono essere eliminati con un panno o una spugna non abrasivi umidi e comuni detersivi non abrasivi. Al termine della pulizia risciacquare bene la superficie. Per ripristinare eventuali segni d'usura, graffi, macchie ostinate e piccole scheggiature, levigare la superficie con carta abrasiva 800 e successivamente 1000, fino ad uniformare la superficie. Per ripristinare poi la lucentezza originaria utilizzare pasta lucidante o polish impiegati per la lucidatura delle carrozzerie delle auto.

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

The lime scale and dirt that deposit on glossy Ceramilux can be removed with a non-abrasive damp cloth or sponge and common, non-abrasive detergents. After cleaning rinse the surface well. To restore any signs of wear, scratches, stubborn stains and small chips, sand the surface with 800 gauge sandpaper and then 1000 until evening out the surface. To then restore the original gloss, use polishing paste or polish used for car bodywork.

Kalk- und Schmutzablagerungen auf der Oberfläche von Ceramilux glänzend können mit einem feuchten, nicht scheuernden Lappen oder Schwamm und handelsüblichen, nicht scheuernden Reinigungsmitteln entfernt werden. Am Ende der Reinigung die Oberfläche gut abspülen. Zum Entfernen eventueller Abnutzungerscheinungen, Kratzer, hartnäckiger Flecken und kleiner Schrammen glätten Sie die Oberfläche mit Sandpapier 800 und anschließend 1000, bis Sie eine gleichmäßige Oberfläche erhalten. Um danach den ursprünglichen Glanz wiederherzustellen, verwenden Sie Polierpasten oder Produkte, die zum Polieren von Autokarosserien verwendet werden.

Le calcaire et la saleté qui se déposent sur la surface de Ceramilux brillant peuvent être éliminés avec un chiffon ou une éponge non abrasifs et humidifiés et avec des détergents non abrasifs que l'on trouve communément dans le commerce. Une fois le nettoyage terminé, bien rincer la surface. Pour restaurer des signes d'usure éventuels, des rayures, des taches tenaces et de petits accrocs, polir la surface avec un papier abrasif 800 et ensuite 1 000 jusqu'à uniformiser la surface. Pour restaurer ensuite la brillance d'origine, utiliser un produit à polir ou un produit lustrant utilisés pour faire briller les carrosseries des voitures.

La cal y la suciedad que se depositan sobre la superficie de Ceramilux brillante pueden ser eliminados con un paño o con una esponja no abrasivos húmedos y detergentes comunes no abrasivos. Al final de la limpieza enjuague bien la superficie. Para restablecer posibles signos de desgaste, rayones, manchas resistentes y pequeñas desportilladuras, frote la superficie con papel abrasivo 800 y a continuación 1000 hasta a uniformar la superficie. Para después restablecer el brillo original utilice pasta brillante o abrillantadores utilizados para sacar brillo a la carrocería de los coches.

Ceramilux opaco / Matt Ceramilux / Ceramilux matt / Ceramilux mat / Ceramilux opaco

Materiale composto da cariche minerali naturali (carbonati di calcio e triidrati di alluminio) e resina poliesteri. Lo strato di solid surface che riveste la superficie del materiale è di tipo poliesteri acrilato con elevate caratteristiche di resistenza e perfetta uniformità. L'estetica e le caratteristiche meccaniche e chimiche rendono questo materiale particolarmente adatto all'arredo di bagno e ambienti pubblici. Ceramilux è ripristinabile al 100% anche con superficie graffiata, macchiata o bruciata e può essere riciclato e riutilizzato a fine vita come inerte. Matériel composé de charges minérales naturelles (carbonate de calcium et de trihydrate d'alumine) et de résine en polyester. La couche de solid surface qui revêt la surface du matériel est en acrylate de polyester avec des caractéristiques de résistance élevées et une uniformité parfaite. L'esthétique et les caractéristiques mécaniques et chimiques permettent à ce matériel d'être adapté au mobilier de salle de bain et aux lieux publics. Ceramilux peut être restauré à 100% même en cas de surface rayée, tachée ou brûlée et il peut être recyclé et réutilisé en fin de vie comme inerte. Ceramilux est moulé par injection et permet donc aux produits d'être réalisés dans leur intégralité sans nécessiter de collages en garantissant une résistance parfaite et une élasticité uniforme en mesure de faire face aux sollicitations et aux écarts thermiques.

Material compuesto por cargas minerales naturales (carbonatos de calcio y trihidratos de aluminio) y resina poliéster. La capa de solid surface que reviste la superficie del material es de tipo poliéster acrilato con elevadas características de resistencia y perfecta uniformidad. La estética y las características mecánicas y químicas convierten a este material especialmente indicado para la decoración del baño y de los ambientes públicos. Ceramilux puede restablecerse al 100% incluso con la superficie rayada, manchada o quemada y además puede ser reciclado y reutilizado hasta el final como inerte. Ceramilux es impreso a inyección y permite a las manufacturas ser realizadas por completo sin necesidad de realizar encolados garantizando una perfecta resistencia y una uniforme elasticidad frente a oscilaciones y saltos térmicos.

Cura e manutenzione Ceramilux opaco / Matt Ceramilux care and maintenance

Pflege und Instandhaltung von Ceramilux matt / Soins et entretien Ceramilux mat / Cuidado y mantenimiento de Ceramilux opaco

Pulire i manufatti in Ceramilux opaco con acqua saponata o comuni detergenti per rimuovere la maggior parte delle macchie e dello sporco che si possono depositare sulla superficie. Si sconsiglia l'utilizzo di prodotti chimici aggressivi quali acetone, trielina, acidi o basi forti. Ceramilux opaco può essere riparato dalle aggressioni superficiali, quali graffi, bruciature di sigaretta e macchie ostinate, adoperando una spugnetta abrasiva Scotch Brite® (marchio registrato 3M) e un comune pulitore abrasivo. Levigare superficialmente la parte danneggiata. Se il difetto è ancora visibile ripassare levigando con carta abrasiva molto fine.

Clean products made in matt Ceramilux with soapy water or common detergents to remove most stains and dirt that may deposit on the surface. We do not recommend using aggressive chemical products such as acetone, trichloroethylene, acids or strong bases Ceramilux can be protected from surface aggressions such as scratches, cigarette burns and stubborn stains by using an abrasive Scotch Brite® (3M trademark) sponge and a common abrasive cleaner. Surface sand the damaged part. If the defect is still visible, sand again with very fine paper.

Reinigen Sie Produkte aus Ceramilux matt mit Seifenwasser oder handelsüblichen Reinigungsmitteln, um die meisten Flecken und Schmutzablagerungen von der Oberfläche zu entfernen. Verwenden Sie für die Reinigung möglichst keine aggressiven Chemikalien wie Aceton, Trichlorethylen, starke Säuren oder Basen. Ceramilux matt kann einfach mit einem Scheuerschwamm Scotch Brite® (registrierte Marke von 3M) und einem handelsüblichen Scheuermittel von oberflächlichen Schäden wie Kratzern, Brandflecken von Zigaretten und hartnäckigen Flecken befreit werden. Schleifen Sie die beschädigte Stelle oberflächlich ab. Wenn der Defekt anschließend noch sichtbar ist, glätten Sie sie mit sehr feinem Sandpapier.

Nettoyer les produits en Ceramilux mat avec de l'eau et du savon ou détergents habituels pour retirer la majeure partie des taches et la saleté qui peuvent se déposer sur la surface. On déconseille d'utiliser des produits chimiques agressifs tels que l'acétone, le trichloréthylène, les acides ou les bases fortes. Ceramilux mat peut être réparé en cas de surface agressée par des rayures, des brûlures de cigarettes et des taches tenaces en utilisant une éponge abrasive Scotch Brite® (marque enregistrée 3M) et un nettoyant abrasif que l'on trouve communément dans le commerce. Polir la surface de la partie abîmée. Si le défaut est encore visible repasser en polissant avec un papier abrasif très fin.

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

Limpie las manufacturas de Ceramilux opaco con agua enjabonada o detergentes comunes para eliminar la mayor parte de las manchas y de la suciedad que puede depositarse en la superficie. Se recomienda utilizar productos químicos agresivos como acetona, bencina quitamanchas, ácidos o bases fuertes. Ceramilux opaco puede ser reparado de las agresiones superficiales, como rayones, quemaduras de cigarrillos y manchas resistentes, utilizando una esponja abrasiva Scotch Brite® (marca registrada 3M) y un limpiador abrasivo común. Frotar superficialmente la parte dañada. Si el defecto aún es visible repase frotando con papel abrasivo muy fino.

Finiture soft touch su Cristalplant e Ceramilux / Soft touch finishing on Cristalplant and Ceramilux

Soft Touch-Oberflächen auf Cristalplant und Ceramilux / Finiture soft touch sur Cristalplant et Ceramilux / Acabados soft touch (toque suave) en Cristalplant y Ceramilux

Queste finiture dalla superficie morbida e vellutata sono ottenute per verniciatura del Cristalplant e/o del Ceramilux, realizzate con un particolare procedimento che ne conferisce una elevata resistenza al graffio. Le finiture di questo tipo sono applicate alla parte esterna del manufatto, sia esso un lavabo o una vasca, lasciando il colore bianco del materiale naturale nella parte interna e superficiale.

These soft and velvety surface finishes are obtained to varnish Cristalplant and/or Ceramilux, made with a particular procedure that conveys high scratch resistance. These types of finishes are applied to the external part of the product, whether a sink or a tub, leaving the white colour of the natural material on the internal and surface part.

Diese Oberflächen, die sich weich und samtig anfühlen, werden durch Lackierung von Cristalplant und/oder Ceramilux mit einem speziellen Verfahren realisiert, das ihnen eine hohe Kratzbeständigkeit verleiht. Die Oberflächen dieser Art werden außen auf das Produkt, also ein Waschbecken oder eine Badewanne, aufgebracht, wobei sie die weiße Farbe des natürlichen Materials auf der Innen- und Außenseite nicht verändern.

Ces finitions de surface souple et veloutée sont obtenues pour les peintures de Cristalplant et/ou de Ceramilux, réalisées avec un procédé particulier qui confère une résistance élevée aux rayures. Les finitions de ce type sont appliquées sur la partie externe du produit, qu'il s'agisse d'un lavabo ou d'une baignoire, en laissant la couleur blanche du matériel naturelle à l'intérieur et en surface.

Estos acabados con una superficie suave y aterciopelada son obtenidas por la aplicación de Cristalplant y/o de Ceramilux, realizadas con un procedimiento particular que aporta una elevada resistencia al arañazo. Los acabados de este tipo son aplicados a la parte externa de la manufactura, tanto si se trata de un lavabo o de una bañera, dejando el color blanco del material natural en la parte interna y superficial.

Finiture Corten su Cristalplant e Ceramilux / Corten finishing on Cristalplant and Ceramilux

Corten-Oberflächen auf Cristalplant und Ceramilux / Finitions Corten sur Cristalplant et Ceramilux / Acabados Corten en Cristalplant y Ceramilux

L'effetto materico Corten è ottenuto con uno smalto in grado di riprodurre fedelmente il vero Corten con il vantaggio di evitare a tutti quei difetti di rilascio della ruggine al quale il materiale è soggetto. La verniciatura avviene in più fasi al fine di garantire l'effetto superficiale "lavato" tipico del materiale, fino al fissaggio con vernice protettiva trasparente ad elevata resistenza.

The Corten matter effect is obtained with an enamel that is capable of faithfully reproducing true Corten with the advantage of avoiding all those defects of rust release that the material is subject to. Varnishing takes place in several phases in order to guarantee the "washed" surface effect typical of the material, until fixing with transparent protective, high resistance varnish.

Der plastische Effekt von Corten wird durch eine Glasur erhalten, die die getreue Nachbildung von echtem Corten gestattet – allerdings ohne die Defekte im Zusammenhang mit der Freisetzung von Rost, die typisch für das Material sind. Die Lackierung erfolgt in mehreren Phasen, wodurch das typische „gewaschene“ Finish des Materials garantiert wird. Der letzte Schritt ist die Fixierung mit einem transparenten und hoch widerstandsfähigen Schutzlack.

L'effet de la matière Corten est obtenu avec une peinture en mesure de reproduire fidèlement le véritable Corten avec l'avantage d'éviter tous les défauts provenant de la rouille auxquels ce matériel est sujet. La peinture se fait en plusieurs phases afin de garantir l'effet superficiel "lavé" typique de ce matériel, jusqu'à la fixation avec peinture protectrice transparente à résistance élevée.

El efecto matérico Corten es obtenido con un esmalte capaz de reproducir fielmente al verdadero Corten con la ventaja de evitar todos aquellos defectos de creación de oxidación al que es sometido el material. La pintura se produce en varias fases con el fin de garantizar el efecto superficial "lavado" típico del material, hasta la fijación con una pintura protectora transparente de alta resistencia.

Cura e manutenzione "Soft touch" e Corten / Care and maintenance "Soft touch" and Corten

Pflege und Instandhaltung "Soft touch" und Corten / Soins et entretien "Soft touch" et Corten / Cuidado y mantenimiento "Soft touch" y Corten

Pulire le parti verniciate in Soft Touch con acqua saponata o comuni detergenti per rimuovere la maggior parte delle macchie e dello sporco che si possono depositare sulla superficie. Si sconsiglia l'utilizzo di prodotti chimici aggressivi quali acetone, trielina, acidi o basi forti.

Clean the parts varnished in Soft Touch with soapy water or common detergents to remove most stains and dirt that may deposit on the surface. We do not recommend using aggressive chemical products such as acetone, trichloroethylene, acids or strong bases.

Reinigen Sie Teile mit Soft-Touch-Lackierung mit Seifenwasser oder handelsüblichen Reinigungsmitteln, um die meisten Flecken und Schmutzablagerungen von der Oberfläche zu entfernen. Verwenden Sie für die Reinigung möglichst keine aggressiven Chemikalien wie Aceton, Trichlorethylen, starke Säuren oder Basen.

Nettoyer les parties peintes en Soft Touch avec de l'eau et du savon ou des détergents habituels pour retirer la majeure partie des taches et de la saleté qui peuvent se déposer sur la surface. On déconseille d'utiliser des produits chimiques agressifs tels que l'acétone, le trichloréthylène, les acides ou les bases fortes.

Limpie las partes pintadas con Soft Touch con agua enjabonada o detergentes comunes para eliminar la mayor parte de las manchas y de la suciedad que puede depositarse en la superficie. Se recomienda utilizar productos químicos agresivos como acetona, bencina quitamanchas, ácidos o bases fuertes

Acciaio inox finitura titanio / Titanium finish stainless steel **Edelstahl mit Titanoberfläche / Acier inox finition titane / Acero inoxidable acabado titanio**

Il trattamento Titanio su acciaio inox avviene con procedure di finitura galvanica e di verniciatura. Tali trattamenti conferiscono alla superficie di questo speciale tipo di acciaio un effetto satinato particolarmente gradevole al tatto e particolarmente resistente.

The Titanium treatment on stainless steel takes place with a galvanic and varnishing finishing procedure. These treatments give the surface of this special type of steel a satin-finish effect that is particularly pleasing to the touch and particularly resistant.

Die Titanbeschichtung auf Edelstahl erfolgt durch Galvanisierung und Lackierung. Diese Verfahren verleihen dieser speziellen Stahloberfläche einen satinierten Effekt, der sich besonders angenehm anfühlt und überaus widerstandsfähig ist.

Le traitement au titane sur acier inox est réalisé au moyen de procédure de finition galvanisée et de peinture. Ces traitements confèrent à la surface de ce type d'acier spécial un effet satiné particulièrement agréable au toucher et particulièrement résistant.

El tratamiento en Titanio sobre el acero inoxidable se realiza con procedimientos de acabado galvanico y de barnizado. Dichos tratamientos otorgan a la superficie, de este tipo especial de acero, un efecto satinado particularmente agradable al tacto y particularmente resistente.

Cura e manutenzione dell'acciaio inox finitura titanio / Care and maintenance of titanium finished stainless steel **Pflege und Instandhaltung von Edelstahl mit Titanoberfläche / Soins et entretien de l'acier inox finition titane / Cuidado y mantenimiento del acero inoxidable acabado titanio**

Utilizzare normali detersivi per la pulizia domestica di tipo neutro e delicato da applicare con una spugna o un panno, non abrasivi, avendo cura di strofinare nel verso della satinatura se presente. Risciacquare con acqua lievemente calda e asciugare con un panno asciutto non abrasivo. Evitare l'uso di qualsiasi sapone o detersivo acido o sostanza solvente o aggressiva. Evitare particolarmente l'uso di prodotti per la pulizia dell'acciaio inox (come Sidel o Smac), poiché la loro caratteristica funzione di rimozione dell'ossido di cromo dalla superficie degli acciai lucidi non trattati, andrebbe a rimuovere l'ossido che concorre all'effetto superficiale della finitura Titanio.

Use normal neutral type and delicate detergents for household cleaning to be applied with a non-abrasive sponge or cloth, taking care not to rub against the satin-finish grain if present. Rinse with warm water and dry with a non-abrasive dry cloth. Do not use any acid detergent, solvent or aggressive substance. Particularly avoid using products for cleaning stainless steel (like Sidel or Smac) because their characteristic function of removing chromium oxide from the surface of untreated polished steel would remove the oxide that contributes to the Titanium finish surface effect.

Verwenden Sie einen normalen neutralen und milden Haushaltsreiniger. Tragen Sie diesen auf einen nicht scheuernden Schwamm oder einen weichen Lappen auf und wischen Sie damit über die Oberfläche in Richtung der vorhandenen Satinierung. Spülen Sie das Reinigungsmittel mit lauwarmem Wasser ab und trocknen Sie die Oberfläche mit einem trockenen, nicht scheuernden Lappen. Verwenden Sie keine sauren oder aggressiven Seifen oder Reinigungsmittel. Vermeiden Sie insbesondere die Verwendung von Edelstahltreinigern (wie Sidel oder Smac). Diese entfernen Chromoxid von der Oberfläche von glänzendem, unbehandeltem Stahl und würden somit der Titanoberfläche schaden.

Utiliser des détergents communs pour le nettoyage domestique de type neutre et délicat, à appliquer avec une éponge ou un chiffon, non abrasifs, en prenant soin de frotter dans le sens du satinage, si présent. Rincer avec de l'eau légèrement chaude et sécher avec un chiffon sec non abrasif. Éviter d'utiliser du savon, des détergents acides, des solvants ou des substances agressives. Éviter en particulier d'utiliser des produits pour le nettoyage de l'acier inox (comme Sidel ou Smac) parce que leur fonction particulière de retrait de l'oxyde de chrome de la surface des aciers brillants non traités retirerait l'oxyde qui contribue à l'effet de la finition Titane sur la surface.

Utilizar detergentes normales para la limpieza doméstica de tipo neutro y delicada a aplicar con una esponja o un paño, que no sean abrasivos, teniendo cuidado de fregar en el sentido del satinado, si está presente. Enjuagar con agua ligeramente caliente y secar con un paño seco no abrasivo. No usar jabón o detergente ácido ni sustancias solventes o agresivas. No usar productos para la limpieza del acero inoxidable (como Sidel o Smac), porque su función característica de eliminación del óxido de cromo de la superficie de los aceros brillantes no tratados, eliminaría el óxido que regala el efecto superficial de acabado Titanio.

Rame trattato lucido e spazzolato / Polished and brushed treated copper **Behandeltes Kupfer mit glänzender und gebürsteter Oberfläche / Cuivre traité brillant et brossé / Cobre tratado brillante y cepillado**

I componenti metallici in rame utilizzati da Falper, quali le cornici degli specchi e i componenti delle vasche e dei lavabi della collezione George, sono realizzati con struttura in acciaio inox rivestita in lamina di rame, con uno speciale trattamento trasparente a caldo, al fine di evitarne l'ossidazione.

The metallic components in copper used by Falper, such as the mirror frames and components in the tubs and sinks of the George collection, are made with a structure in stainless steel covered in copper laminate with a special transparent heat treatment in order to prevent oxidation.

Die von Falper verwendeten Metallkomponenten aus Kupfer, wie die Spiegel und verschiedene Bestandteile der Badewannen und Waschbecken der Kollektion George, werden aus Edelstahl gefertigt, mit einer Kupferfolie beschichtet und einer speziellen transparenten Rostschutz-Wärmebehandlung unterzogen.

Les composants métalliques en cuivre utilisés par Falper tels que les cadres des miroirs et les composants des baignoires et des lavabos de la collection George sont réalisés avec une structure en acier inox revêtue d'une pellicule de cuivre, avec un traitement à chaud spécial transparent afin d'éviter l'oxydation.

Los componentes metálicos en cobre utilizados por Falper, como los marcos de los espejos y los componentes de las bañeras y lavabos de la colección George se realizan con una estructura en acero inoxidable recubierta en lámina de cobre, con un tratamiento especial transparente en caliente, para evitar la oxidación.

Cura e manutenzione del rame / Copper care and maintenance **Pflege und Instandhaltung von Kupfer / Soins et entretien du cuivre / Cuidado y mantenimiento de cobre**

Utilizzare normali detersivi per la pulizia domestica di tipo neutro e delicato da applicare con una spugna o un panno, non abrasivi, avendo cura di strofinare nel verso della satinatura se presente. Risciacquare con acqua lievemente calda e asciugare con un panno asciutto non abrasivo. Evitare l'uso di qualsiasi sapone o detersivo acido o sostanza solvente o aggressiva, inclusi i prodotti contenenti cloro.

Use normal neutral type and delicate detergents for household cleaning to be applied with a non-abrasive sponge or cloth, taking care not to rub against the satin-finish grain if present. Rinse with warm water and dry with a non-abrasive dry cloth. Do not use any acid detergent, solvent or aggressive substance, including products that contain chlorine.

Verwenden Sie einen normalen neutralen und milden Haushaltsreiniger. Tragen Sie diesen auf einen nicht scheuernden Schwamm oder einen weichen Lappen auf und

CARATTERISTICHE E CURA DEI MATERIALI | CHARACTERISTICS AND CARE OF THE MATERIALS

| EIGENSCHAFTEN UND PFLEGE DER VON MATERIALIEN | CARACTÉRISTIQUES ET SOIN DES MATÉRIAUX | CARACTERÍSTICAS Y CUIDADO DE LOS MATERIALES

wischen Sie damit über die Oberfläche in Richtung der vorhandenen Satinierung. Spülen Sie das Reinigungsmittel mit lauwarmem Wasser ab und trocknen Sie die Oberfläche mit einem trockenen, nicht scheuernden Lappen. Verwenden Sie keine aggressiven Seifen oder Reinigungsmittel wie saure oder chlorhaltige Produkte.

Utiliser des détergents communs pour le nettoyage domestique de type neutre et délicat, à appliquer avec une éponge ou un chiffon, non abrasifs, en prenant soin de frotter dans le sens du satinage, si présent. Rincer avec de l'eau légèrement chaude et sécher avec un chiffon sec non abrasif. Éviter d'utiliser du savon, des détergents acides, des solvants ou des substances agressives y compris les produits contenant du chlore.

Utilizar detergentes normales para la limpieza doméstica de tipo neutro y delicado a aplicar con una esponja o un paño, que no sean abrasivos, teniendo cuidado de fregar en el sentido del satinado, si está presente. Enjuagar con agua levemente caliente y secar con un paño seco no abrasivo. No usar jabón o detergente ácido o sustancia solvente o agresiva, ni productos que contengan cloro.

Vetro laccato lucido e satinato / Glossy and satin lacquered glass **Glänzend lackiertes und satinertes Glas / Verre laqué brillant et satiné / Vidrio lacado brillante y satinado**

I top in vetro ed i top in vetro con lavabo integrato sono realizzati con vetro di sicurezza extra chiaro, con procedimento di termoformatura nel caso dei lavabi integrati. Successivamente i top seguono un processo di detensionamento e di colorazione interna a freddo con vernici all'acqua. I top in vetro satinato sono ulteriormente trattati sulla superficie visibile con procedimento di sabbatura e di formattazione della superficie con un procedimento antimacchia e antiimpronta permanente con vernici nanotecnologiche.

Glass tops and glass tops with built-in sinks are made with extra clear safety glass with a heat moulding procedure in the case of built-in sinks. Subsequently the tops follow a relaxation and internal cold colouring process with water-based varnishes. Frosted glass tops are further treated on the visible surfaces with a sanding and formatting process of the surface with a permanent stain-resistant and fingerprint resistant procedure with nanotechnological varnishes.

Die Waschtischplatten aus Glas mit oder ohne eingeformtem Becken sind aus extra hellem Sicherheitsglas gefertigt, wobei die Becken durch ein thermisches Verfahren eingeformt werden. Anschließend werden die Waschtischplatten einem Kaltverfahren zur Entspannung und internen Färbung mit Wasserlacken unterzogen. Waschtischplatten aus satiniertem Glas werden zusätzlich auf der sichtbaren Oberfläche sandgestrahlt und mit einer nanotechnologische Lackversiegelung zum dauerhaften Schutz vor Flecken und Fingerabdrücken behandelt.

Les plans hauts en verre et en verre avec lavabo intégré sont réalisés avec un verre de sécurité extra clair, à l'aide d'un procédé de thermoformage pour les lavabos intégrés. Ensuite, les plans hauts suivent un processus de détensionnement et de coloration interne à froid avec des peintures à l'eau. La surface visible des plans hauts en verre satiné est ensuite traitée avec un procédé de sablage et de formatage de surface avec un processus anti-tâche et anti-empreinte permanent avec des peintures au traitement nanotechnologique.

Los top de vidrio y los top de vidrio con lavabo integrado están realizados con vidrio de seguridad extra claro, con un procedimiento de termoformación en el caso de los lavabos integrados. A continuación los top siguen un proceso de detensionamiento y de coloración interna en frío con pinturas al agua. Los top de vidrio satinado después son tratados sobre la superficie visible con un proceso de arenado y de formación de la superficie con un procedimiento antimanchas y antihuellas permanente con pinturas nanotecnológicas.

Cura e manutenzione top in vetro / Care and maintenance of glass tops **Pflege und Instandhaltung von Waschtischplatten aus Glas / Soins et entretien des plans hauts en verre / Cuidado y mantenimiento de los top de vidrio**

Per la pulizia ordinaria impiegare normali prodotti per la pulizia del vetro o detersivi a Ph Neutro avendo l'accortezza di asciugare bene. Non utilizzare pagliette, spugne abrasive, alcool e detersivi che possano lasciare aloni. Pulire i vetri con stracci di cotone o sintetici che non lascino residui sui vetri. La superficie del top è molto resistente agli acidi, ma la vernice interna potrebbe essere attaccata da un contatto prolungato con sostanze acide o basiche; si sconsiglia, non utilizzare prodotti acidi (anticalcare) o basici (candeggina, soda caustica). Si raccomanda, inoltre, di evitare bruschi cambiamenti di temperatura (shock termico) e di non superare la temperatura di utilizzo di 60°.

For routine cleaning use normal glass cleaning products or Ph Neutral detergents, being careful to dry well. Do not use paper wool, abrasive sponges, alcohol and detergents that may leave marks. Clean the glass with cotton or synthetic cloths that do not leave residue on glass. The surface of the top is highly resistant to acids, but the internal varnish could be attacked by prolonged contact with acid or base substances. We do not recommend using acid product (anti-lime scale) or base products (bleach, caustic soda). We also recommend avoiding abrupt temperature changes (thermal stress) and not exceeding an operating temperature of 60°.

Verwenden Sie zur regelmäßigen Reinigung einen normalen Glasreiniger oder ein pH-neutrales Reinigungsmittel und trocknen Sie die Oberfläche anschließend gründlich. Verwenden Sie keinen Alkohol und keine Topfkratzer, Scheuerschwämme oder Reinigungsmittel, die Flecken hinterlassen können. Reinigen Sie Glas mit Baumwoll- oder synthetischen Lappen, die keine Rückstände hinterlassen. Während die Oberfläche der Waschtischplatte sehr widerstandsfähig gegenüber Säuren ist, könnte der interne Lack durch einen längeren Kontakt mit sauren oder basischen Substanzen angegriffen werden; verwenden Sie daher möglichst keine sauren (Entkalker) oder basischen (Bleiche, Natronlauge) Produkte. Außerdem sollten starke Temperaturschwankungen (thermischer Schock) vermieden und beim Gebrauch nicht die Temperatur von 60° überschritten werden.

Pour le nettoyage courant, utiliser des produits nettoyants habituels pour le verre ou des détergents au Ph neutre en prenant bien soin de sécher. Ne pas utiliser de paillettes, éponges abrasives, alcool et détergents qui peuvent laisser des auréoles. Nettoyer les surfaces vitrées avec des chiffons en coton ou synthétiques qui ne laissent pas de résidus sur le verre. La surface du plan haut est très résistante aux acides mais la peinture interne pourrait être attaquée par un contact prolongé avec des substances acides ou basiques ; il est déconseillé d'utiliser des produits acides (anti-calcaire) ou basiques (eau de javel, soude caustique). De plus, il est recommandé d'éviter des changements de température trop brusques (choc thermique) et de ne pas dépasser la température d'utilisation de 60°.

Para la limpieza ordinario emplear productos normales de limpieza del vidrio o detergentes con Ph Neutro teniendo cuidado de secarlo bien. No utilice estropajos, esponjas abrasivas, alcohol y detergentes que puedan dejar aureolas. Limpiar los vidrios con trapos de algodón o sintéticos que no dejen residuos sobre los vidrios. La superficie del top es muy resistente a los ácidos, pero la pintura interna podría ser atacada por un contacto prolongado con sustancias ácidas o básicas; no se recomienda utilizar productos ácidos (anti cal) o básicos (lejía, sosa cáustica) Además se recomienda evitar bruscos cambios de temperatura (golpe térmico) y no superar la temperatura de uso de 60°.

Pellami Baxter / Baxter Leathers / Leder Baxter / Peaux Baxter / Cueros Baxter

Kashmir Nuage – Kashmir Fumee - Kashmir Sucre

Articolo realizzato su pelli intere. Pelle bovina pieno fiore nabuccato spessore 1.6/1.8 mm. Concia vegetale bianca. Tintura all'anilina passante. Standard EN-ISO: solidità alla luce > non conforme | sfregamento a secco > conforme | sfregamento a umido > non conforme. La pelle Kashmir risponde al desiderio di proporre un articolo assolutamente esclusivo. Partendo dai migliori grezzi al mondo essa si distingue dalla produzione industriale già al momento della concia in quanto . completamente priva di cromo e altri metalli, ma allo stesso tempo supera le limitazioni della concia al vegetale, restituendo una pelle molto pi. morbida e dal tatto fascinoso. Le pelli Kashmir sono ecologiche e biodegradabili. A ciò si aggiunge una lavorazione minimalista che non va ad intaccare le caratteristiche di naturalezza; quindi tintura all'anilina, asciugatura all'aria e nessun processo di rifinitura. L'aspetto finale della pelle presenta una nabuccatura più o meno profonda a seconda delle zone del manto, data da un procedimento proprietario assolutamente esclusivo, che dona al prodotto finito un aspetto vagamente vintage e una mano attraente, che supera il concetto di nabuck.

Item created using whole hides. Full-grain nabucked leather: thickness 1.6/1.8 mm. White vegetable tanned. Aniline-dyed. EN-ISO standards: fastness to light > noncompliant | fastness to abrasion (dry test) > compliant | fastness to abrasion (wet test) > non-compliant. Kashmir leather responds to the desire to offer an absolutely exclusive article. Using the best raw materials in the world, it stands out from runof-the-mill industrial production from the very moment of tanning, being completely free from chromium and other metals, but at the same time it overcomes the limitations of vegetable tanning, making the leather extremely soft and smooth to the touch. Kashmir leathers are ecological and biodegradable. Added to this is the minimalist processing which does not affect its natural characteristics; then aniline dyeing, air drying and no finishing process. The final appearance of the leather has a nabucking effect that is more or less deep depending on the area of the hide, provided by the exclusive process which gives the finished product a vaguely aged effect, that goes way beyond the concept of nabuck.

Aus ganzen Häuten hergestellter Artikel. Nubucato-Rindsvollleder Dicke 1,6/1,8 mm Pflanzliche Weißgerbung. Mit Anilin durchgefärbtes Leder. EN-ISO Standard: Lichtbeständigkeit > nicht konform | Reibechtheitstest trocken > konform | Reibechtheitstest nass > nicht konform. Das Leder Kashmir entspricht dem Wunsch des Herstellers, ein absolut exklusives Produkt zur Verfügung zu stellen. Ausgehend von den weltbesten Rohledern unterscheidet sich diese Lederart bereits im Moment der Gerbung von industriellen Häuten, denn es ist völlig frei von Chrom und sonstigen Metallen, übersteigt jedoch gleichzeitig die Grenzen der pflanzlichen Gerbung, wodurch ein ausgesprochen weiches und unglaublich samtig anzufühlendes Leder hergestellt wird. Die Häute Kashmir sind ökologisch und biologisch abbaubar. Dem kommt eine minimalistische Verarbeitungsprozedur hinzu, die in keiner Weise die natürliche Beschaffenheit des Leders beeinträchtigt; schließlich Anilinfärbung, Lufttrocknung und kein weiteres Veredelungsverfahren. Das Endergebnis ist ein mehr oder weniger tief eingefärbtes Nubucato (Glattleder mit der Optik eines Nubukleders), je nachdem, welche Hautteile verwendet werden. Dies dank der absolut exklusiven Vorgangsweise, die dem Endprodukt einen leichten Vintage-Stil und ein absolut attraktives Aussehen verleiht, das dem allgemein üblichen Konzept von Nubukleder überlegen ist.

Article réalisé sur cuirs entiers. Cuir de bovin pleine fleur nubuck d'une épaisseur de 1,6/1,8 mm. Tannerie végétale blanche. Teinture à l'aniline passante. Norme EN-ISO : Résistance à la lumière > non conforme | frottement à sec > conforme | frottement humide > non conforme. Le cuir Kashmir répond au désir de proposer un article exclusif. En partant des meilleurs tissus bruts au monde, il se distingue par la production industrielle déjà au moment du tannage, puisqu'entièrement sans chrome et autres métaux, mais en même temps, il dépasse les limites du tannage au végétal, en restituant un cuir beaucoup plus souple, au touché fascinant. Les cuirs Kashmir sont écologiques et biodégradables. À cela s'ajoute un travail minimaliste qui n'attaque par les caractéristiques naturelles ; donc teinture à l'aniline, séchage à l'air et aucun processus de finition. L'aspect final du cuir présente un nubuck plus ou moins profond en fonction des zones de la couche, dû à un processus propriétaire absolument exclusif, qui donne au produit fini un aspect vaguement vintage et une main attrayante, qui dépasse le concept de nubuck.

Artículo realizado en pieles enteras. Piel de vacuno plena flor nobuk espesor 1.6/1.8 mm Curtido vegetal blanco. Anilina teñida Estándar EN-ISO: solidez a la luz > no conforme | refregamiento en seco > conforme | refregamiento mojado > no conforme. La piel Kashmir responde al deseo de proponer un artículo absolutamente exclusivo. Partiendo de los mejores materiales brutos del mundo esta piel se caracteriza por la producción industrial en el momento del curtido pues no contiene cromo ni otros metales, pero al mismo tiempo supera las limitaciones del curtido al vegetal, dejando una piel mucho más suave y de tacto agradable. Las pieles Kashmir son ecológicas y biodegradables. A esto se le añade una elaboración minimalista que no altera las características de naturalezza; por lo tanto alinina teñida, secada al aire y sin ningún proceso de acabado. El aspecto final de la piel presenta un efecto nobuk más o menos profundo según las zonas de la piel, debido a un procedimiento exclusivo que da al producto acabado un aspecto vagamente vintage y una mano atractiva, que supera el concepto de nobuk.

River Nelson

Articolo realizzato su pelli intere. Pelle bovina pieno fiore spessore 2.0/2.2 mm. Concia al cromo. Tintura all'anilina passante. Protezione con prodotti idro e oleorepellenti. Standard EN-ISO: solidità alla luce > conforme | sfregamento a secco > conforme | sfregamento a umido > non conforme. Le pelli River assumono il caratteristico aspetto opaco liscio a cuoio dopo la stesura di particolari cere in più fasi, che vengono successivamente smosse in speciali botti asciutte e che lasciano trasparire tutto il vissuto del manto, come per esempio venature e zone di chiaro/scuro naturale.

Made with whole hides. Full-grain leather: thickness 2.0/2.2 mm. Chrome tanned. Aniline-dyed. Treated with water and oil repellents. EN-ISO standards: colour fastness to light > compliant | fastness to abrasion (wet test) > not compliant | fastness to abrasion (dry test) > compliant. The River leathers take on a smooth opaque leather appearance after applying special waxes in several phases, which are subsequently removed in special dry barrels and which reveal the layer's past, for example the grain and natural light/dark areas.

Aus ganzen Häuten hergestellter Artikel. Rindsvollleder Dicke 2,0/2,2 mm. Chromgerbung. Mit Anilin durchgefärbtes Leder. Öl- und wasserabweisende Schutzbehandlung. EN-ISO Standard: Lichtbeständigkeit > konform | Reibechtheitstest trocken > konform | Reibechtheitstest nass > nicht konform. Die River Häute erhalten nach der mehrfachen Behandlung mit besonderen Wachsarten, deren Überschuss anschließend in speziellen Trockenbottichen wieder entfernt werden, ihr charakteristisches mattes und glattes lederartiges Aussehen, wobei Narben und natürliche Hell/Dunkelzonen der Haut besonders zur Geltung kommen.

Article réalisé sur cuirs entiers. Cuir de bovin pleine fleur d'une épaisseur de 2,0/2,2 mm. Tannage au chrome. Teinture à l'aniline passante. Protection à l'aide de produit hydro- et oléophobe. Norme EN-ISO : Résistance à la lumière > conforme | frottement à sec > conforme | frottement humide > non conforme. Les cuirs River ont l'aspect caractéristique opaque lisse de cuir après l'application de cires particulières en plusieurs phases, qui sont ensuite retirées par des coups secs spécifiques et qui laissent transparaitre tout le vécu de la couche, par exemple les veines et les zones de clair/foncé naturelles.

Artículo realizado en pieles enteras. Piel de vacuno plena flor espesor 2.0/2.2 mm. Curtido al cromo. Anilina teñida Protección con productos repelentes al agua y a la grasa. Estándar EN-ISO: solidez luz > conforme | refregamiento en seco > conforme | refregamiento mojado > no conforme. Las pieles River asumen el característico aspecto opaco liso de cuero después de la extensión de ceras particulares durante algunas fases, que se eliminan en especiales barriles secos y que dejan traslucir la señales de la piel, como por ejemplo vetas y zonas de claro/oscuras naturales.

Bo.Hemian Kaki e Siberian

Articolo realizzato su pelli intere di nativi americani. Pelle bovina pieno fiore nabuccato spessore 1.6/1.8 mm. Concia e riconcia al cromo. Tintura all'anilina pura. Protezione con prodotti idrorepellenti. Standard EN-ISO: solidità alla luce > non conforme | sfregamento a secco e a umido > conforme. Il vissuto del manto, quali cicatrici, pungoli, rughe e spinature, caratteristiche di questa pelle estremamente naturale, viene esaltato con speciali processi di lavaggi. Il prodotto grazie alla nabuccatura finale ottiene un marcato effetto chiaro/scuro. La pelle risulta di grande morbidezza e con un tatto sensuale. L'articolo Bo.Hemian nasce come progetto di pelle naturale, che anziché nascondere i segni del manto li esalta. Ridefinisce il concetto di "difetto" elevandolo a testimonianza di una vita libera e di una texture caratteristica.

Item created using whole, native-American hides. Full-grain nabucked cattle leather with thickness of 1.6/1.8 mm. Chrome tanning and re-tanning. Pure aniline dye. Protection with water-repellent products. EN-ISO standards: fastness to light > non-compliant | fastness to abrasion wet and dry test > compliant. The aged-look of the hide, with its scratches, scars, wrinkles and chafes, characteristic of this extremely natural leather, is enhanced by special washing processes. The product, thanks to the final nabuck processing obtains a marked light/dark effect. The leather is extremely soft with a sensual touch. The item Bo.Hemian was created as a natural leather design, which instead of masking the signs of the hide, enhances them. It redefines the concept of "defect", enhancing it to testify to a life of freedom and of a characteristic texture.

Aus ganzen Häuten von Indianern hergestellter Artikel. Nubucato-Rindsvolleleder Dicke 1.6/1.8 mm. Chrom-Gerbung und Nachgerbung. Mit reinem Anilin durchgefärbtes Leder. Wasserabweisende Schutzbehandlung. EN-ISO Standard: Lichtbeständigkeit > nicht konform | Reibechtheitstest trocken und nass > konform. Die Beschaffenheit des Hautmaterials wie Narben, Hornrisse, Falten und Dornenrisse, die Merkmale dieser extrem natürlichen Lederart, wird durch spezielle Waschvorgänge noch besonders hervorgehoben. Nach dem endgültigen Anschleifen (Nubuk-Behandlung) bekommt das Produkt seinen ausgeprägten Hell/Dunkel Effekt. Die Haut präsentiert sich extrem weich und mit einem unglaublich sinnlichen Tastgefühl. Der Artikel Bo.Hemian wurde entworfen, um den Eindruck von natürlichem Leder zu vermitteln, welcher die besonderen Beschaffenheiten und kleinen Mängel der Haut nicht verbirgt, sondern extra hervorhebt. Dabei wird der Begriff "Defekt" neu definiert und steht nun als Beweis für ein freies Leben und für eine charakteristische Maserung.

Article réalisé sur des cuirs entiers de natifs américains. Cuir de bovin pleine fleur nubuck d'une épaisseur de 1,6/1,8 mm. Tannage et retannage au chrome. Teinture à l'aniline pure. Protection avec des produits hydrophobes. Norme EN-ISO : Résistance à la lumière > non conforme | frottement à sec ou humide > conforme. Le vécu de la couche, telles que les cicatrices, les aiguillons, les rides et les entailles, caractéristiques de ce cuir extrêmement naturel, est exalté par des processus spéciaux de lavage. Le produit grâce au nabuckage final obtient un effet marqué clair/foncé. Le cuir donne l'impression d'une grande souplesse et d'un touché sensuel. L'article Bo.Hemian naît comme projet de cuir naturel, qui plutôt que de cacher les signes de la couche, les exalte. Il redéfinit le concept de « défaut » en l'élevant au témoignage d'une vie libre et d'une texture caractéristique.

Artículo realizado en pieles enteras de nativos americanos. Piel de vacuno plena flor nobuk espesor 1.6/1.8 mm Curtido y recurtido al cromo. Alinina teñida pura. Protección con productos repelentes al agua. Estándar EN-ISO: solidez a la luz > no conforme | refregamiento en seco o mojado > conforme. Las señales de la piel, como cicatrices, agujadas, arrugas y cortes, característicos de esta piel extremadamente natural, son exaltadas con especiales procesos de lavados. El producto gracias al efecto nobuk final obtiene un marcado efecto claro/oscuro. La piel queda más suave y con un tacto sensual. El artículo Bo.Hemian nace como proyecto de piel natural, que en vez de esconder las señales de la piel las exalta. Redefine el concepto de "defecto" elevándolo a prueba de una vida libre y de una textura clásica.

Cura e manutenzione / Care and maintenance / Pflege und Instandhaltung / Soins et entretien / Cuidado y mantenimiento

Le ricordiamo che è consigliabile tenere il prodotto lontano da fonti dirette di calore, quali caloriferi o camini, e di luce, quali finestre, che possono far virare notevolmente il colore della pelle. È importante, in occasione di qualsiasi operazione di pulizia, strofinare la pelle umida con molta delicatezza, in quanto il "fiore" della stessa diventa più delicato. In caso di macchie liquide . fondamentale, ove possibile, pulire tempestivamente con un panno assorbente, avendo cura di non allargare la macchia, ma di restringerla il più possibile, effettuando movimenti dall'esterno verso il centro. In caso invece di macchie grasse, come cioccolato, marmellata, rossetto, etc. . fondamentale, ove possibile, prima rimuovere tempestivamente l'eccesso con un oggetto non abrasivo, ciò per esempio con un cucchiaino, sempre avendo cura di non allargare la macchia, ma di restringerla il più possibile, effettuando movimenti dall'esterno verso il centro. In seguito, se necessario, utilizzare il pulitore specifico (da richiedere all'azienda) con un panno, sempre avendo cura di non allargare la macchia. Nell'eventualità in cui le problematiche siano più complesse e per qualsiasi dubbio in proposito, Le consigliamo di rivolgersi al nostro ufficio tecnico (tecnico@falper.it).

Let us remind you that we strongly recommend keeping your genuine product away from direct heat sources such as heaters or fireplaces, and light such as from windows as heat and light can cause significant changes in the leather's colour. It is important, when cleaning the leather, to rub the moistened leather very gently, as the "grain" becomes more delicate when damp. When there is a liquid stain it should be cleaned immediately with an absorbent cloth. Be careful not to enlarge the stain, but to reduce it as much as possible, by cleaning from the edge of the stain towards the middle. If there are large stains of chocolate, jam or lipstick, etc., always remove the excess quickly with, for example, the smooth edge of a spoon taking care not to make the stain larger, but to reduce it as much as possible by working from the edge toward the centre of the mark. If it is still necessary, use the specific cleanser on a cloth taking care not to enlarge the mark. If the problems are more complex, and you are not sure what to do, we suggest that you contact our technical office (tecnico@falper.it).

Wir empfehlen Ihnen, das Produkt nicht in der Nähe von Wärme- oder Lichtquellen wie Heizkörper, Kamine oder Fenster aufzustellen, weil die Farbe des Leders dadurch verblassen kann. Achten Sie bei der Reinigung darauf, das angefeuchtete Leder immer nur sehr sanft abzureiben, weil die Ledernarbe im Laufe der Zeit empfindlicher wird. Wenn Flüssigkeit auf das Leder getropft ist, sollte man diese schnellstens mit einem entsprechenden Tuch so aufsaugen, dass die Flüssigkeit nur auf einer möglichst kleinen Fläche von dem Leder aufgenommen wird. Dazu das Tuch immer vom äußeren Fleckenrand zur Mitte bewegen. Bei Fettflecken durch Schokolade, Marmelade, Lippenstift usw. zuerst die überschüssige fetthaltige Substanz schnell mit einem stumpfen Gegenstand, z. B. einem kleinen Löffel, abnehmen. Dabei immer darauf achten, dass der verschmutzte Bereich so klein wie möglich bleibt. Dazu den Löffel vom äußeren Fleckenrand zur Mitte bewegen. Bei Bedarf anschließend den Fleck mit dem entsprechenden Reinigungsmittel (in unserem Unternehmen erhältlich) mit einem Tuch sanft reinigen. Achten Sie dabei immer darauf, dass sich der Fleck nicht vergrößert. Bei allen anderen Problemen oder Fragen wenden Sie sich an unsere technische Beratungsstelle (tecnico@falper.it).

Nous vous rappelons qu'il est conseillé de tenir le produit éloigné de toute source directe de chaleur, comme les radiateurs ou les cheminées, ou de lumière telle que les fenêtres, qui peuvent dénaturer notablement les couleurs du cuir. Il est important, lors des opérations de nettoyage, de frotter le cuir humide très délicatement, dans la mesure où la « fleur » de ce dernier devient plus délicate. En cas de taches liquides, il est fondamental, là où c'est possible, de nettoyer le cuir en temps utile à l'aide d'un chiffon absorbant, en prenant soin de ne pas agrandir la tache, mais de la réduire au mieux, en effectuant des mouvements de l'extérieur vers le centre. À l'inverse, en cas de taches de gras, comme le chocolat, la confiture, le rouge à lèvres, ou autres, il est impératif, là où c'est possible, de retirer tout d'abord rapidement l'excès avec un objet non abrasif, comme par exemple une cuillère, toujours en prenant soin de ne pas agrandir la tache, mais de la réduire le plus possible en effectuant des mouvements de l'extérieur vers le centre. Ensuite, si nécessaire, utiliser le nettoyant adapté (à demander à l'entreprise) avec un chiffon, toujours en veillant à ne pas élargir la tache. Dans le cas de problématiques plus complexes ou de tout autre doute à ce propos, nous vous conseillons de vous adresser à notre bureau technique (tecnico@falper.it) ; nous serons heureux de pouvoir vous aider.

Le ricordamos que es recomendable conservar el producto lejos de fuentes directas de calor, como radiadores o chimeneas, o de luz, como ventanas, ya que pueden alterar en gran medida el color de la piel. Al realizar cualquier operación de limpieza, es importante frotar la piel húmeda con mucha delicadeza puesto que la "flor" de la misma se hace más delicada. En el caso de manchas de líquidos, es fundamental, si es posible, limpiarlas tempestivamente con un paño absorbente, con cuidado de no extenderlas, sino de hacerlas lo más pequeñas posibles realizando movimientos de fuera hacia el centro. En cambio, en el caso de manchas grasas, como de chocolate, mermelada, pintalabios, etc., es fundamental, siempre que sea posible, quitar primero el exceso con un objeto no abrasivo como, por ejemplo, una cucharilla, con cuidado de no extenderlas sino de hacerlas lo más pequeñas posibles realizando movimientos de fuera hacia el centro. A continuación, si es necesario, aplicar el limpiador específico (que solicitar a la empresa) con un paño y tener siempre cuidado de no extender la mancha. En el caso de que el problema sea más complejo o si tiene alguna duda al respecto, le recomendamos ponerse en contacto con nuestra oficina técnica (tecnico@falper.it).

Ecopelle bianca / White faux leather / Weißes Kunstleder / Simili cuir blanc / Ecopiel blanca

Pelle sintetica creata appositamente per uso nautico e outdoor con elevata resistenza alla luce e all'abrasione.

Speziell für den Einsatz im Schifffahrtsambiente oder im Freien geschaffenes Kunstleder mit hoher Lichtbeständigkeit und Abriebfestigkeit.

Simili cuir synthétique créé spécialement pour usage nautique et activités en plein air avec une résistance élevée à la lumière et à l'abrasion.

Ecopiel sintética especialmente creada para la náutica y el aire libre, con elevada resistencia a la luz y a la abrasión.

Cura e manutenzione / Care and maintenance / Pflege und Instandhaltung / Soins et entretien / Cuidado y mantenimiento

Per la pulizia di macchie e sporco quotidiano, usare una soluzione di sapone neutro e acqua calda, o usare un detergente non abrasivo utilizzando un panno o una spazzola a setole morbide. Successivamente sciacquare con acqua e asciugare con un panno. Non usare solventi di alcun tipo.

For regular cleaning, apply a solution of neutral soap and warm water or non-abrasive detergent with a cloth or a soft brush. Then, rinse with water and dry with a cloth. Do not use solvents.

Zum Entfernen von Flecken und alltäglichem Schmutz ist eine Lösung aus neutraler Seife und warmem Wasser oder ein nichtschleifendes Reinigungsmittel mit einem Tuch oder einer weichen Bürste zu verwenden. Danach mit Wasser abspülen und mit einem Tuch trocknen. Keinerlei Lösungsmittel verwenden.

Pour le nettoyage de taches ou de saleté quotidienne, utiliser une solution de savon neutre et eau chaude, ou bien employer un détergent non abrasif en se servant d'un chiffon ou d'une brosse à poils doux. Ensuite rincer avec de l'eau et essuyer avec un chiffon. Ne pas utiliser de solvants de n'importe quel type.

Para la limpieza de las manchas y la suciedad cotidiana, utilice una solución de jabón neutro y agua caliente, o un detergente no abrasivo, con un paño o un cepillo de cerdas suaves. A continuación, enjuague con agua y seque con un paño. No utilice ningún tipo de solvente.

Cura e manutenzione lavabi colorati / Care and maintenance of coloured basins / Pflege und Instandhaltung von farbigen Waschbecken / Soins et entretiens des vasques couleur / Cuidado y mantenimiento de los lavabos colorados

Pulire con un panno umido; per una pulizia più approfondita aggiungere all'acqua detersivi liquidi, sciacquare con acqua e asciugare con un panno morbido. Non utilizzare prodotti abrasivi o prodotti contenenti cloro o acetone.

Clean with a damp cloth; for more thorough cleaning, add liquid detergent to the water, rinse with water and dry with a soft cloth. Do not use abrasive products or products containing chlorine or acetone.

Mit einem feuchten Tuch reinigen; für eine gründlichere Reinigung dem Wasser flüssige Reinigungsmittel hinzufügen, mit Wasser spülen und mit einem weichen Tuch trocknen. Keine schmirgelnden Produkte oder Produkte verwenden, die Chlor oder Aceton enthalten.

Nettoyer avec un chiffon humide; pour un nettoyage plus approfondi, ajouter un détergent liquide à l'eau, rincer avec de l'eau et essuyer avec un chiffon doux. Ne pas utiliser de produits abrasifs ou de produits à base de chlore ou d'acétone.

Limpie con un trapo húmedo; para una limpieza más profunda añada detergentes líquidos al agua, enjuague con agua y seque con un paño suave. No utilice productos abrasivos o que contengan cloro y acetona.

CONDIZIONI DI VENDITA

- I prezzi si intendono Iva esclusa, franco ns/Stabilimento.
- I termini previsti per l'approntamento e la consegna non sono da intendere come essenziali e saranno indicati nell'Accettazione d'Ordine; sono in ogni caso fatti salvi i ritardi sui quali abbiano influito cause di forza maggiore o, comunque cause non pienamente imputabili alla Venditrice.

- *The above-mentioned conditions are intended as fully accepted with the order conferment.*

VERKAUFSBEDINGUNGEN

- Die Preise verstehen sich ausschließlich Mehrwertsteuer, frei ab Werk.
- Die Bereitstellungs- und Lieferfristen dürfen nicht als grundlegend verstanden werden, sie werden bei Annahme des Auftrags angegeben; auf keinen Fall sind diese jedoch bei Verspätungen, die Fällen von höherer Gewalt oder Ursachen, die nicht eindeutig der Verkäuferfirma zuzuschreiben sind, bindend. Es wird hiermit vereinbart, daß keine Verspätung den Käufer dazu berechtigt, Schadenersatz oder eine Vertragsauflösung zu verlangen. Die Lieferung der Produkte kann auch in Form von verschiedenen Teillieferungen erfolgen.
- **Der Versand erfolgt stets auf Risiko und Gefahr des Käufers, auch denn die Ware frei Bestimmungsort verkauft wurde. Der Käufer ist verpflichtet die ankommenden Waren zu kontrollieren und eventuelle Schäden oder ein Aufbrechen von Verpackung bei der Lieferung sofort zu beanstanden. Dazu muss der Vermerk "Warenannahme unter Vorbehalt" auf dem Lieferschein angegeben werden. Eventuelle Schäden müssen außerdem innerhalb von 8 Tagen der Firma Falper per Einschreiben mitgeteilt werden.**
- Aufträge, deren Gesamtpreis unter € 105,00 netto liegt, werden nicht ausgeführt, jedoch in Erwartung von eventuellen Zusatzaufträgen bereitgehalten. Davon sind Ersatzteilbestellungen ausgenommen.
- Eine eventuelle Warenrücksendung wird nur dann akzeptiert, wenn sie zuvor von unserer Geschäftsleitung bewilligt worden ist. Die Waren müssen frachtfrei in unser Werk in Ozzano gesandt werden. Auf die zurückgesandten Waren werden 20% für allgemeine Kosten berechnet, sowie eventuell weitere Kosten, falls der Kunde unvorsichtig gehandelt hat.
- Spezielle Verpackungen aus Holz oder eventuell notwendige Paletten werden zum Kostenpreis verrechnet.
- **FALPER behält sich das Recht vor, ohne vorherige Benachrichtigung auf ihren Modellen technische oder das Aussehen betreffende Veränderungen anzubringen, falls diese notwendig sind.**
- Falls in Verbindung mit dieser Vereinbarung und/oder den einzelnen Verkaufsverträgen zwischen den Handelspartnern Rechtsstreite entstehen sollten, ist nur das Gericht von Bologna zuständig, wobei der Käufer ausdrücklich darauf verzichtet, sich an andere Gerichte zu wenden, auch im Falle von Konnexität.
- Die oben aufgeführten Bedingungen gelten bei Eingang des Auftrags als vollständig angenommen.

CONDITIONS DE VENTE

- Les prix n'incluent pas la TVA et sont franco notre établissement.
- Les délais prévus pour la préparation et la livraison sont primordiaux et seront indiqués sur le bon de commande; les retards dus pour causes de force majeure ou, dans tous les cas, dont le vendeur n'est pas complètement considéré responsable sont cependant exclus. On convient toutefois qu'aucun retard ne donnera à l'acheteur le droit d'être indemnisé pour les dommages ou résilier le contrat. La livraison des produits pourra également avoir lieu en plusieurs livraisons successives partielles.
- **La marchandise voyage toujours au risque et péril de l'acheteur, même dans le cas de ventes franco destination. L'acheteur est tenu de contrôler la marchandise à son arrivée et de signaler les dommages et les détériorations des emballages au moment du déchargement, en formulant des "réserves" sur le bulletin de livraison et en communiquant à Falper l'ampleur des dommages éventuels, dans un délai de 8 jours, par courrier recommandé.**
- Les commandes inférieures à € 105,00 au net ne seront pas exécutées et seront cependant tenues en considération dans l'attente de suppléments éventuels. Les pièces de rechange éventuelles sont bien sûr exclues.
- Le retour éventuel de la marchandise ne sera accepté qu'après autorisation préalable de notre direction et devra cependant parvenir franc de port auprès de nos établissements d'Ozzano. Dans tous les cas, on appliquera une augmentation de 20% pour les frais généraux sur la marchandise rendue, outre à des frais éventuels dus à la négligence du client.
- Des emballages particuliers nécessaires en bois ou palettes seront facturés selon leur coût.
- **La société Falper se réserve le droit de modifier sans préavis ses propres modèles en cas de nécessité du point de vue technique ou esthétique.**
- Pour tout litige concernant le présent accord entre les parties et /ou les contrats de vente individuels, la compétence sera exclusivement du tribunal de Bologne et l'acheteur devra expressément renoncer à d'autres tribunaux, ne serait-ce qu'à titre de simple liaison.
- On considère que les conditions ci-dessus sont intégralement acceptées simultanément à l'arrivée de la commande.

CONDICIONES DE VENTA

- Los precios son IVA excluida, franco nuestro establecimiento.
- Los plazos previstos para la preparación y la entrega no deben ser considerados como esenciales y serán indicados en la Aceptación del Pedido; salvo, de todos modos, los retrasos en los que pudieren influir causas de fuerza mayor o, por cualquier otra causa no plenamente imputable a la Vendedora. Se conviene, de todos modos, que ningún retraso podrá dar derecho al Comprador al resarcimiento de daños o a resolución del contrato. La entrega de los productos podrá efectuarse mediante entregas sucesivas y parciales.
- **La mercancía se transporta siempre a riesgo y peligro del comprador incluso cuando haya sido vendida franco destino. El comprador tiene que controlar la mercancía al recibirla reclamando eventuales daños o alteraciones de los embalajes al descargar, indicando "la aceptación con reserva" en el albarán de entrega o documento de porte y comunicando a Falper la importancia de los daños dentro de 8 días por carta certificada.**
- No se despacharán pedidos inferiores a € 105,00 netos, que de todos modos se tendrán en consideración en espera de eventuales aumentos del pedido. Por todo lo antes expuesto se excluyen eventuales piezas de recambio.
- La mercancía devuelta será aceptada sólo si hubiera sido previamente autorizada por nuestra Dirección y tendrá que enviarse con porte pagado a nuestro establecimiento de Ozzano. De todos modos la mercancía sufrirá un aumento del 20% por gastos generales, además de cualquier otro gasto debido al descuido del Cliente.
- Embalajes especiales de madera o palets eventualmente necesarios serán facturadas al costo.
- **FALPER se reserva el derecho de aportar las modificaciones técnicas y estéticas a sus propios modelos, que pudieran ser necesarias, sin previo aviso.**
- Por cualquier controversia relativa al presente acuerdo entre las Partes y/o a cada contrato de compraventa, es exclusivamente competente el fuero de Bolonia renunciando expresamente el Comprador a la competencia de otros Tribunales, incluso a título de conexión.
- Las condiciones citadas se consideran aceptadas integral y contextualmente al recibir el pedido.
